*"Anyone suffering Downton Abbey withdrawal symptoms (who isn't?) will find an instant tonic in Daisy Goodwin's The American Heiress. The story of Cora Cash, an American heiress in the s who bags an English duke, this is a deliciously evocative first novel that lingers in the mind."*

Most of my characters are fictional but I have used a few real life characters such as the Prince of Wales. Queen Victoria had been on the throne for sixty years and her son the Prince of Wales was eating his way through three thirteen course meals a day. On the other side of the Atlantic fortunes were being made every day and the new American millionaires were coming East to buy themselves the best of what the Old World had to offer. Consuelo was forced into this marriage by her domineering mother Alva who longed for the social cachet that being the mother of a Duchess would bring her. The marriage was not a happy one. The Titled American American heiresses on the look out for a title could consult a quarterly periodical called the Titled American which listed all the American women who had married titled foreigners and gave a list of eligible titled bachelors together with their address, the size of their estate and the size of their debts. Tattoos One of the most fascinating things I came across in my research was the fashion for tattoos among the aristocracy in the late nineteenth century. It started when the future George V and his brother went round the world by sea and came back with a rich assortment of tattoos. Their father the Prince of Wales followed suit and so did many of his friends. Fashion Parisian fashion 19th Century Cora has a fabulous wardrobe courtesy of M. An heiress like Cora would go to Paris once or maybe twice a year and come back with sixty or seventy dresses " each one would be sent over in its own specially designed trunk. Any socially ambitious woman would rather stay at home than be seen twice in the same dress. Some of the sleeves were so wide that women had to turn sideways to walk through doorways. Money If you were an impoverished english aristocrat than marrying an American heiress was nice work if you could get it. About a quarter of the British aristocracy married into American money. The endless summer of the Edwardian aristocracy was largely paid for by American money. The houses she lives in are vast, grandiose piles with every modern convenience. But when she goes to live at Lulworth Castle she discovers to her horror that there are no bathrooms, let alone central heating. Life in the English country house for a rich American girl was seriously uncomfortable. My heroine is horrified that every time she wants to have a bath, a housemaid has to carry several gallons of hot water up from the kitchen half a mile away. Read Mail on Sunday Article by Daisy:

*The American Heiress, which could have been a prequel to a Downton Abbey type story line, left me flat. The biggest problem was I simply didn't care for the characters. The biggest problem was I simply didn't care for the characters.*

Would I recommend this book for Sometimes authors come around that just make you feel like a novice. I loved this book. It was everything it ought to be. I rate each book in two ways, its morality and its entertainment. This is not a critique blog per-se. I will not be delivering sermons. Just a few facts, a few opinions, with a splash of colored boxes and stars. This is a resource, not a conversation. Guest Raters Jennifer is 38 years old. She is married with two kids, and has been gifted with four step children. She lives and works in Blackfoot, ID. She is a social worker in the mental health field, and most of her clients are in mental health court. She has always loved reading, and it has been a great escape from the stresses of her everyday life. Which can be overwhelming at times! She enjoys reading all different types of genres, and tries to stretch out of her comfort zone often. I have 5 grown kids whom I read to everyday when they were young. I went through the JRR Tolkien Lord of the Ring series including the Silmarillion five times while rocking and feeding babies way back in the 70s and 80s. I am still reading every spare minute! I love fiction, fantasy, mystery to spy novels. One of these days I just may sit down and write my own book!
