Occasionally, someone will ask a question about geomancy that will get me to my proper computer to type a proper response, which would be burdensome on my phone. Recently, someone asked just such a question, and this time about one of the bits of geomantic systems I really enjoy discussing: The forum member was in a state of confusion about how the elements were assigned to the figures, what the difference was between inner and outer elemental rulerships, and whether these rulerships had any system at all behind them or whether they were just spurious and irrelevant. You can bet your last coin I gave a response to this, especially to that last part of the question. In short, the outer element of a figure is the element of the sign of the Zodiac he associates with a geomantic figure, while the inner element is more closely tied to the nature and elemental structure of the figure itself. In every case but one—Populus, which has no manifest elements at all—the inner element is a manifest element, marked by a single dot. The outer element shows how the figure expresses itself in the world around it, while the inner element shows what kind of power is in the figure itself. Fortuna Major, for example, has Fire as its outer element, which represents its power to reshape the world in a favorable way. There are at least as many ways of assigning the elements to the figures in this way as there are for linking the figures with the Zodiacal signs. Two of them seem to work well in divination. The first of these simply uses the elements that correspond to the Zodiacal signs just given. I have made one change in the system as Agrippa gives it; he assigned Laetitia to Air and Rubeus to Fire, but I have reversed these in order to bring the inner element and the elemental structure into harmony. Now we proceed to declare with what Planets these Figures are distributed; for hereupon all the propriety and nature of Figures and the judgement of the whole Art dependeth: Therefore the greater and lesser Fortune are ascribed to the Sun; but the first or greater Fortune is when the Sun is diurnall, and posited in his dignities; the other, or lesser Fortune is when the Sun is nocturnall, or placed in lesse dignities: Via, and Populus that is, the Way, and People are referred to the Moone; the first from her beginning and encreasing, the second from her full light and quarter decreasing; Acquisitio, and Laetitia which is Gaine, Profit; Joy and Gladness are of Jupiter: But the first hath Jupiter the greater Fortune, the second the lesse, but without detriment: Puella, and Amissio are of Venus; the first fortunate, the other as it were retrograde, or combust: Coniunctio and Albus are both Figures of Mercury, and are both good; but the first the more Fortunate: Puer and Rubeus are Figures ascribed to Mars; the first whereof hath Mars benevolent, the second malevolent: Carcer, and Tristitia are both Figures of Saturn, and both evill; but the first of the greater detriment: And these are the infallible comparisons of the Figures, and from these wee may easily discern the equality of their signes; therefore the greater and lesser Fortunes have the signes of Leo, which is the House of the Sun: Puella and Rubeus have for their signe Scorpio, the House of Mars: The Dragons head and taile are thus divided, the head to Capricorne, and the Dragons taile adhereth to Scorpio; and from hence you may easily obtaine the triplicities of these signs after the manner of the triplicities of the signes of the Zodiak: Albus, Amitia, and Tristitia, doe make the Airy triplicity: But if any one will constitute these triplicities according to the nature of the Planets, and Figures themselves, let him observe this Rule, that Fortuna major, Rubeus, Puer, and Amissio doe make the fiery triplicity: Fortune minor, Puella, Laetitia and Coniunctio triplicity of the Ayre: Acquisitio, the Dragons taile, Via, and Populus doe governe the watry triplicity; and the earthly triplicity is ruled by Carcer, Tristitia, Albus, and the Dragons head. And this way is rather to be observed then the first which we have set forth; because it is constituted according to the Rule and manner of the signes. This order is also far more true and rationally then that which vulgarly is used, which is described after this manner: And Caput, Fortuna major, Carcer, and Tristitia are of the earthly triplicity. As it turns out, Agrippa gives three separate ways to associate the elements with the geomantic

figures: The first is given at the end of the second paragraph, where Agrippa associates the elements to the figures based on the sign of the Zodiac he gives them. To show which systems were used where in the European geomantic literature, I went through some of my books and texts and came up with the following table showing which author used what elemental rulership system for the figures. This is by no means a complete or exhaustive list, but just a small sample of texts to show how varied this can get between authors.

Sanders applied for conscientious objector status during the Vietnam War ; his application was eventually turned down, by which point he was too old to be drafted. He ran as the Liberty Union candidate for governor of Vermont in and and as a candidate for U. This forced the races for lieutenant governor and secretary of state to be decided by the state legislature when its vote total prevented either the Republican or Democratic candidates for those offices from garnering a majority of votes. He was mayor for eight years, from April 6, , to April 4, Republicans had found Paquette so unobjectionable that they failed to field a candidate in the March race against him, leaving Sanders as his principal opponent. Two other candidates in the race, independents Richard Bove and Joe McGrath, proved to be essentially non-factors in the campaign, with the battle coming down to Paquette and Sanders. The Sanders campaign was bolstered by a wave of optimistic volunteers as well as by a series of endorsements from university professors, social welfare agencies, and the police union. The final result came as a shock to the local political establishment, with the maverick Sanders winning by just 10 votes. After serving four two-year terms, Sanders chose not to seek reelection in Under Sanders, Burlington became the first city in the country to fund community-trust housing. House of Representatives Representative Sanders in See also: It was noted by The Washington Post and others as the first election of a socialist to the United States House of Representatives in decades. Former Lieutenant Governor Peter P. In , Sanders co-founded the Congressional Progressive Caucus , a group of mostly liberal Democrats that Sanders chaired for its first eight years, [14] while still refusing to join the Democratic Party or caucus. Sanders said he voted for the bill "because it included the Violence Against Women Act and the ban on certain assault weapons". He was nevertheless extremely critical of the other parts of the bill. In this same intervention, he argued that the repressive policies introduced by the bill were not addressing the causes of violence, stating that "we can create meaningful jobs, rebuilding our society, or we can build more jails". The amendment passed the House by a bipartisan majority, but was removed on November 4 of that year in Houseâ€”Senate negotiations and never became law. He voted for the Authorization for Use of Military Force Against Terrorists [99] that has been cited as the legal justification for controversial military actions since the September 11 attacks. Senate Elections Sanders being sworn in as a U. Senate on April 21, , after Senator Jim Jeffords announced that he would not seek a fourth term. Chuck Schumer , chairman of the Democratic Senatorial Campaign Committee , endorsed Sanders, a critical move as it meant that no Democrat running against Sanders could expect to receive financial help from the party. Dean said in May that he considered Sanders an ally who "votes with the Democrats 98 percent of the time. Many national media outlets projected Sanders as the winner just after the polls closed, before any returns came in. Sanders because his ideas are usually far to the left of the majority of the Senate Sanders has largely found ways to press his agenda through appending small provisions to the larger bills of others. On September 24, , Sanders posted an open letter to Treasury Secretary Henry Paulson decrying the initial bank bailout proposal; it drew more than 8, citizen cosigners in 24 hours. How many homes can you own?
