

Chapter 1 : Sei Juushi Bismarck Episodes

In The Bismarck Episode a veteran naval writer tells the intense and dramatic story of how the battleship was discovered, pursued, and ultimately destroyed.

A comprehensive and definitive history of the American Civil War. TV Show Star Rating: It is on syndication in America on the Military Channel. This series is in full color, combining both original and colorized footage. It documents from pre-Columbian to the end of the 19th century. Much of the information comes from text, eyewitnesses, pictorials, and computer graphics. We have a history worth celebrating. Long before the first Europeans arrived here, there were some nations already in North America. They blanketed the continent from coast to coast, from Central America to the Arctic. There were tens of millions of people here, speaking over languages. Many of them lived in beautiful cities, among the largest and most advanced in the world. In the coming hours, Nations looks back on those ancient cultures, how they lived, and how many survived But we can open our eyes and give the first nations of this land the recognition and respect they deserve: An Intimate History Chronicles the lives of Theodore, Franklin and Eleanor Roosevelt, three members of the most prominent and influential family in American politics. It is the first time in a major documentary television series that their individual stories have been interwoven into a single narrative. An accompanying text to the series, titled Michael Wood: As in most of his documentaries, Michael Wood explains historical events by travelling to the places where they took place, examining archaeological and historical evidence at first hand and interviewing historians and archaeologists, as well as talking with local people. Chapter 2 : Bismarck | TV Show | Watch on Kodi

The Bismarck Episode has 26 ratings and 1 review. Jill said: This is not an easy book to read as it is extremely detailed about every move made by the Br.

Plot[edit] In the distant future, humanity has explored beyond Earth and colonized both the inner and outer planets of the Solar System. In order to protect the colonies and maintain law and order in the solar system, the Earth Federation Government EFG was created. While a strained peace was being forged between Earth and the colonies, a race of non-human creatures known as Deathcula invaded the System. Without provocation, they attacked the colonies and killed many of the colonists. The EFG quickly realized that the Deathcula were technologically superior and their forces were hopelessly outmatched. In order to have a chance at survival, Dr. Charles Louvre developed a transformable starship known as the Bismarck. Knowing that an advanced team of specialists were required to operate the Bismarck, four individuals came together and were charged with keeping the outer colonies safe from further Deathcula attacks. A motoracing driver, Shinji is optimistic, full of energy, and is more than a little hot-headed and impulsive the classic Anime hero. He takes up racing, and eventually becomes the youngest champion of all time. Personally, Shinji is less successful with women, becoming nervous whenever they are around. This does not prevent him from eventually becoming romantically involved with Marianne Louvre, as they have known each other since childhood. He is generally depicted as being a gentleman with a cool head for tactics and decisions. Richard is an expert with both swords and horses, and is described as "legendary" for his skills and marksmanship. Having great pride in his Scottish heritage, Richard is also proficient at playing the accordion, and yearns to return home to his girlfriend, Sincia. Bin Shimada Bill Willcox Bill Willcox is a famous year-old American jet pilot and sharpshooter, and holds an almost infallible accuracy with firearms. When his parents were killed by the Deathcula, Bill devoted his life to avenging them, and this feeling continues even after becoming part of the Bismarck team. The joker of the group, Bill is a friendly and disarming charmer, and somewhat of a loner. He is also an outrageous flirt, making mostly unsuccessful passes at nearly every woman he meets. Kazuhiko Inoue Marianne Louvre Marianne Louvre is the year-old daughter of Professor Charles Louvre, is of French nationality and is the engineer who led the construction of the Bismarck. A computer genius, Marianne was the chief envoy from the colonies to Earth. When the Deathcula attack, she calls on the colonies to join the EFG. During this meeting between the colony leaders, Marianne is chosen to join the Bismarck team, much to the pleasure of her father. Marianne is very technically minded, and most often helps her teammates from her station aboard the Bismarck. Marianne and Shinji have known each other since childhood, and soon become romantically involved. A well-respected politician, he founded the Bismarck Team during the second Deathcula attack in order to fight the Deathcula, and decided to use the most powerful arm of the EFG, the Bismarck robot, to defend the area around Ganymede. Louvre personally chooses Shinji Hikari as team leader. Deathcula[edit] Deathcula are aliens who, after destroying their own planet in an internal war, transferred on the planet Metheus. Unfortunately, this planet was also dying, so the Deathcula chose to leave it and conquer the Solar System. Their technology is quite advanced, and their society is one of discipline and obedience. Physically Deathcula look and act like humans, except that they have pointed ears and canine teeth. Due to this similarity, Deathcula are easily able to infiltrate and imitate humans. Hyuza Hyuza is the chancellor of the Deathcula, and is a tall, frightening cyborg with a demonic death mask for a face. His most trusted commanders are Perios and Gustav, but nevertheless Hyuza keeps them under tight control. Perios is a cold, self-centered strategist, is a great pilot and sharpshooter, and is good at manipulating others. He is extremely ambitious, fears no one and is overly tenacious. Hirotaka Suzuoki General Zatola Zatola wears a grotesque helmet, and as one of the main rivals of the Bismarck Team is the commander who orchestrates the Ganymede invasion. He receives legions of soldiers for battle, and his directives come from Hyuza himself. On occasion he can be seen infiltrating the human colonies. He seems to fear Hyuza, but is also quite loyal to him.

Chapter 3 : Sei Juushi Bismarck Episode 1 English Sub/Dub

The Royal Navy's battle with Bismarck is a pivot point in the Second World War. If Bismarck succeeded in attacking the British convoy system, then Britain would be forced to surrender and there would have been no bridgehead for an Anglo American liberation of Europe.

Adolf Hitler made the christening speech. The seventh division consisted of specialists, including cooks and carpenters, and the eighth division consisted of ammunition handlers. The radio operators, signalmen, and quartermasters were assigned to the ninth division. The last three divisions were the engine room personnel. When Bismarck left port, fleet staff, prize crews, and war correspondents increased the crew complement to over 2,000 men. Bismarck also carried four Arado Ar reconnaissance floatplanes, with a single large hangar and a double-ended catapult. When attempting to steer the ship solely through altering propeller revolutions, the crew learned that Bismarck could be kept on course only with great difficulty. Even with the outboard screws running at full power in opposite directions, they generated only a slight turning ability. The tests proved she was a very stable gun platform. Severe weather hampered efforts to remove the wreck, and Bismarck was not able to reach Kiel until March. He returned to Sweden with a detailed description of the ship, which was subsequently leaked to Britain by pro-British elements in the Swedish Navy. The information provided the Royal Navy with its first full description of the vessel, although it lacked important facts, including top speed, radius of action, and displacement. On the way, the ship was escorted by several Messerschmitt Bf fighters and a pair of armed merchant vessels, along with an icebreaker. The ship reached Kiel the following day, where her crew stocked ammunition, fuel, and other supplies and applied a coat of dazzle paint to camouflage her. British bombers attacked the harbour without success on 12 March. The two Scharnhorst-class battleships were based in Brest, France, at the time, having just completed Operation Berlin, a major raid into the Atlantic. Bismarck and Tirpitz were to sortie from the Baltic and rendezvous with the two Scharnhorst-class ships in the Atlantic; the operation was initially scheduled for around 25 April, when a new moon period would make conditions more favourable. To further complicate the situation, Gneisenau was torpedoed in Brest and damaged further by bombs when in drydock. Scharnhorst required a boiler overhaul following Operation Berlin; the workers discovered during the overhaul that the boilers were in worse condition than expected. She would also be unavailable for the planned sortie. The two ships would not be ready for action until July or August. Four U-boats would be placed along the convoy routes between Halifax and Britain to scout for the raiders. She was joined at At approximately the same time, a group of ten or twelve Swedish aircraft flying reconnaissance encountered the German force and reported its composition and heading, though the Germans did not see the Swedes. A pair of Supermarine Spitfires was ordered to search the Norwegian coast for the flotilla. On the evening of 20 May, Bismarck and the rest of the flotilla reached the Norwegian coast; the minesweepers were detached and the two raiders and their destroyer escorts continued north. The following morning, radio-intercept officers on board Prinz Eugen picked up a signal ordering British reconnaissance aircraft to search for two battleships and three destroyers northbound off the Norwegian coast. The rest of the Home Fleet was placed on high alert in Scapa Flow. Eighteen bombers were dispatched to attack the Germans, but weather over the fjord had worsened and they were unable to find the German warships. The three escorting destroyers were detached at The Germans encountered some ice at around Two hours later, the pair had reached a point north of Iceland. The ships were forced to zigzag to avoid ice floes. The cruiser laid a smoke screen and fled into a fog bank, ending the brief engagement. The harsh weather broke on the morning of 24 May, revealing a clear sky. Battle of the Denmark Strait At Both German ships concentrated their fire on Hood. About a minute after opening fire, Prinz Eugen scored a hit with a high-explosive Within a few minutes, Prinz Eugen scored a pair of hits on the battleship that started a small fire. The stern also rose as water rushed into the ripped-open compartments. The British battleship scored a hit on Bismarck with her sixth salvo, but the German ship found her mark with her first salvo. Guns malfunctioned on the recently commissioned British ship, which still had civilian technicians aboard. The first struck her in the forecastle above the waterline but low enough to allow the crashing waves to enter the hull.

The second shell struck below the armoured belt and exploded on contact with the torpedo bulkhead completely flooding a turbo-generator room and partially flooding an adjacent boiler room. The Germans ceased fire as the range widened. Shell-splinters from the second hit also damaged a steam line in the turbo-generator room, but this was not serious, as Bismarck had sufficient other generator reserves. The combined flooding from these two hits caused a 9-degree list to port and a 3-degree trim by the bow. Another battleship, King George V or Renown, turned away damaged. Two heavy cruisers maintain contact. Rear Admiral Frederic Wake-Walker, the commander of the two cruisers, ordered Prince of Wales to remain behind his ships. Two old Revenge-class battleships were ordered into the hunt: Prinz Eugen was therefore recalled temporarily. Prince of Wales fired twelve salvos at Bismarck, which responded with nine salvos, none of which hit. The action diverted British attention and permitted Prinz Eugen to slip away. Unless Bismarck could be slowed, the British would be unable to prevent her from reaching Saint-Nazaire. The inexperienced aviators nearly attacked Norfolk and the U. Bismarck evaded eight of the torpedoes launched at her, but the ninth [83] struck amidships on the main armoured belt, throwing one man into a bulkhead and killing him and injuring five others. The ship suffered more serious damage from manoeuvres to evade the torpedoes: Neither scored a hit. The sea water that had flooded the number 2 port side boiler threatened to enter the number 4 turbo-generator feedwater system, which would have permitted saltwater to reach the turbines. By morning on 25 May, the danger had passed. This required the ships to steam for ten minutes to port, then ten minutes to starboard, to keep the ships on the same base course. He then ordered the ship to circle away to the west and then north. This manoeuvre coincided with the period during which his ship was out of radar range; Bismarck successfully broke radar contact and circled back behind her pursuers. After half an hour, he informed Wake-Walker, who ordered the three ships to disperse at daylight to search visually. Force H, with the aircraft carrier Ark Royal and steaming up from Gibraltar, was still at least a day away. The signals were intercepted by the British, from which bearings were determined. They were wrongly plotted on board King George V, leading Tovey to believe that Bismarck was heading back to Germany through the Iceland-Faeroe gap, which kept his fleet on the wrong course for seven hours. By the time the mistake had been discovered, Bismarck had put a sizeable gap between herself and the British ships. Tovey could now turn his forces toward France to converge in areas through which Bismarck would have to pass. Most British forces were not close enough to stop her. Somerville ordered an attack as soon as the Swordfish returned and were rearmed with torpedoes. The magnetic detonators failed to work properly and Sheffield emerged unscathed. The second attack comprised fifteen aircraft and was launched at Shell fragments rained down on Sheffield, killing three men and wounding several others. The Swordfish then attacked; Bismarck began to turn violently as her anti-aircraft batteries engaged the bombers. The force of the explosion was largely contained by the underwater protection system and the belt armour but some structural damage caused minor flooding. The explosion also caused much shock damage. Though fuel shortages had reduced the number of ships available to the British, the battleships King George V and Rodney were still available, along with the heavy cruisers Dorsetshire and Norfolk. We will fight to the last shell. Intended to boost morale, the messages only highlighted the desperate situation in which the crew found itself. The third shell hit from Prince of Wales had damaged the steam line on the aircraft catapult, rendering it inoperative. As it was not possible to launch the aircraft it had become a fire hazard, and was pushed overboard. At that point, he would turn south to put his ships parallel to his target. Bismarck returned fire at A second shell from this salvo struck the forward main battery which was disabled, though it would manage to fire one last salvo at He managed to fire three salvos before a shell destroyed the gun director, disabling his equipment. He gave the order for the guns to fire independently, but by She was slowly settling by the stern from uncontrolled flooding with a 20 degree list to port. Tovey could not cease fire until the Germans struck their ensigns or it became clear they were abandoning ship.

Chapter 4 : Remembering the Sinking of the Bismarck - HISTORY

*The Bismarck episode [Russell Grenfell] on calendrierdelascience.com *FREE* shipping on qualifying offers. The British Navy's sinking of a notorious symbol of Nazi Germany, the battleship Bismarck, in May ranks as one of the most significant victories of the Second World War.*

Fri Jan 06, 1: These excerpts pertain to the events of May At last she was in sight. It was nearly a week since Sir John Tovey had first heard of her being in the fiord near Bergen; and during the long and anxious days that had followed she had seemed almost too slippery and elusive ever to be caught. But there she was now in front of him, cornered in the end. However, though she had been lamed and overtaken, none of her exceedingly sharp teeth had yet been drawn. There was the prospect of a sharp fight. Then she, too, joined in. But he was laughingly silenced by the Admiral, who said he preferred not to be given the exact moment when a in. Having been given latitude to manoeuvre independently, Captain Dalrymple-Hamilton altered course to port and brought his A-arcs to bear. Since he was under fire and the enemy might start getting hits at any moment, it seemed time to develop his full gunpower in retaliation. The value of this manoeuvre was not, however, to be tested. She had been pierced and rent time after time by heavy and light shells from two battleships and two cruisers. He had given her a hammering by gunfire that he had no conception any ship could stand. But there she was, still above water. If she could bear all that without going down, who could tell how much more she might not endure? And Sir John was already quite certain that he could not afford to spend any more time on firing at this ship. It was imperative that his force should start back. He had waited dangerously long, as it was; and every extra half-hour would make his return more hazardous. He looked at the burning hulk, lying deep and sluggish in the water, that had once been a fighting battleship. It was obvious to him that whether she sank now or sank later, she would never get back to harbour. He was going home.
