

Chapter 1 : calendrierdelascience.com | The Queens Court

The outgoing court will serve until the crowning of the new queen at the Italian Heritage Grand Ball in San Francisco. What does it mean to be Queen Isabella? Queen Isabella is the primary focal point of the Italian Heritage Parade.

In a world where everyone seems to have an opinion on every subject, the Queen has been resolutely tight-lipped about hers. When something hurtful or wrong is reported she bites her tongue. As a young woman she was a global superstar, but she does not play to the media in a gushing way and certainly does not court them. This silence – this lack of defined image – allows for much interpretation. The Queen is a cipher: She becomes a sort of mirror, reflecting back any opinion that the holder wishes to project upon her. And that brings us to the matter at hand. Her preferred method of expression? Her jewelry – specifically, her enormous collection of brooches, the glittering ornaments that she pins to her coat or dress for nearly every public engagement. Twitter and Donald Trump. In recent years, I have received numerous messages from readers who are grateful for this site as a place to escape from the overwhelming rhetoric of daily life. How could it be? Most of the jewelry discussed here is worn by people in power, and power is inherently political. Even so, I try very hard to make this a place where people can discuss jewelry and its personal and historical implications in a civil, friendly way, devoid of the kind of sniping and anger that seems to have infected so many of our conversation spaces. Accordingly, when it was first announced last year that the current American president would be making his way to the United Kingdom for an official visit with the Queen, I decided not to cover the visit on the site. This was a personal choice. As I do not hold the same views as the president, I thought it would be best simply not to speak about him here at all, in any context. This website was not designed to be my personal soapbox. As this week has progressed, however, keeping silent about recent events has become increasingly impossible. In the end, presenting my own views on the issues here, in a central place, as succinctly as I can, seems like the best option. During those audiences, the Queen wore a brooch that she received in May during the last state visit from an American president: The Queen had previously worn the brooch for the "return dinner" during the May state visit, a black-tie dinner hosted by President and Mrs. Obama at Winfield House, the London home of the American ambassador. For this visit, the Queen wore a diamond and platinum brooch inherited from her late mother. When the Queen Mother died in , the Queen inherited the Palm-Leaf, and it has become one of her most-worn brooches. One of her recent appearances in the brooch came in March , when she wore it for the decommissioning of HMS Ocean in Plymouth. For this visit, the Queen wore a new brooch set with diamonds and sapphires. The brooch, intended to resemble a snowflake, was presented to her as a Sapphire Jubilee gift on July 19, , by the then-Governor General of Canada, David Johnston. This was the first time that the Queen wore the brooch in public. Julie discussed the brooches that had been worn on Thursday, Friday, and Saturday, and concluded that the Queen was using her jewels to engage in what she termed "brooch warfare. On Thursday, she wore a brooch that was given to her by the President and Mrs. Obama, which Julie argues was chosen because it was given to the Queen "out of friendship with the Obamas as people. This "brooch warfare" theory is basically another one of those moments. And the brooch is always significant. When organizations give her a brooch, she often wears that brooch each time she visits them. Military badges are brought out for appropriate events. Foreign gifts often only see the light of day when representatives of that country encounter the Queen again. The Queen often uses her brooches to make statements, but like everything else she does, those statements are diplomatic. Her entire six decade reign has been geared toward avoiding controversy as much as possible. She is the living embodiment of the state, and in that representative role, she remains studiously neutral. Perhaps she finds his behavior and his views objectionable, even repugnant. The Queen knows better than to let her private self, political views included, mix with her public persona. She hosted Tito for a luncheon at Buckingham Palace shortly before her coronation and later visited him in Yugoslavia. She presented Mugabe with a knighthood in an honor that was later rescinded. In , she met with Assad at Buckingham Palace. She welcomed Ceausescu for a state visit in . Historians have written about her personal, private unease with some of these encounters, but each visit was undertaken with the same practiced, diplomatic cool that she has perfected during her reign.

That, privately, she enjoys the "trolling" and the "owning" and the "shade" that so many on social media relish today. Part of her success lies in the fact that her studied neutrality allows all of us to believe that she might be with us, no matter what we believe. But the Queen is never, ever going to tell us in certain terms what she thinks about the political world she has inhabited for more than half a century. So, what we have in the end is a trio of brooches. You can develop, as Julie has done, an interpretation of the jewels that sees them as a collective attempt to jab at a political adversary. Well, maybe â€” but only if you see the complicated, delicate, and often fraught world of international diplomacy as a lighthearted game.
