With this in mind, she tells Aspen that she cannot continue their romantic liaisons. Instead of getting discouraged, Aspen claims that he will fight even harder to win her love again over Maxon. The book ends with America finally realizing that she is exactly where she ought to be – among The Elite.

Or one with gritty realism? A novel that has had an immense social impact? Or one that has more subtly affected the world? Here is a list of 12 novels that, for various reasons, have been considered some of the greatest works of literature ever written. Written by Russian novelist Leo Tolstoy, the eight-part towering work of fiction tells the story of two major characters: Tolstoy molds together thoughtful discussions on love, pain, and family in Russian society with a sizable cast of characters regarded for their realistic humanity. The novel was especially revolutionary in its treatment of women, depicting prejudices and social hardships of the time with vivid emotion. The novel won a Pulitzer Prize in and the next year was made into an Academy Award-winning film. Its iconic characters, most notably the sympathetic and just lawyer and father Atticus Finch, served as role models and changed perspectives in the United States at a time when tensions regarding race were high. To Kill a Mockingbird earned the Pulitzer Prize for fiction in and was made into an Academy Award-winning film in , giving the story and its characters further life and influence over the American social sphere. The Great Gatsby Fitzgerald, F. The novel is told from the perspective of a young man named Nick Carraway who has recently moved to New York City and is befriended by his eccentric nouveau riche neighbor with mysterious origins, Jay Gatsby. In fantastical form, the novel explores the genre of magic realism by emphasizing the extraordinary nature of commonplace things while mystical things are shown to be common. A Passage to India Forster, E. Forster wrote his novel A Passage to India after multiple trips to the country throughout his early life. The book was published in and follows a Muslim Indian doctor named Aziz and his relationships with an English professor, Cyril Fielding, and a visiting English schoolteacher named Adela Quested. When Adela believes that Aziz has assaulted her while on a trip to the Marabar caves near the fictional city of Chandrapore, where the story is set, tensions between the Indian community and the colonial British community rise. The possibility of friendship and connection between English and Indian people, despite their cultural differences and imperial tensions, is explored in the conflict. Often confused with H. In each location he faces extreme adversity and discrimination, falling into and out of work, relationships, and questionable social movements in a wayward and ethereal mindset. The novel is renowned for its surreal and experimental style of writing that explores the symbolism surrounding African American identity and culture. Invisible Man won the U. The novel was lauded for addressing the psychological effects of slavery and the importance of family and community in healing. Beloved was awarded the Pulitzer Prize for fiction in Dalloway describes exactly one day in the life of a British socialite named Clarissa Dalloway. Using a combination of a third-person narration and the thoughts of various characters, the novel uses a stream-of-consciousness style all the way through. The thoughts of the characters include constant regrets and thoughts of the past, their struggles with mental illness and post-traumatic stress from World War I, and the effect of social pressures. The novel follows an Igbo man named Okonkwo, describing his family, the village in Nigeria where he lives, and the effects of British colonialism on his native country. The novel is an example of African postcolonial literature, a genre that has grown in size and recognition since the mids as African people have been able to share their often unheard stories of imperialism from the perspective of the colonized. The novel is frequently assigned for reading in courses on world literature and African studies. At a time when the author felt compelled to hide her true identity, Jane Eyre provided a story of individualism for women. Set in the post-Civil War American South, the novel follows a young African American girl named Celie into adulthood in letters she writes to God and to her sister Nettie. Celie faces sexual abuse by her father and eventually her husband, chronicling her own suffering and growth as well as that of her friends and

We are not generally retelling the exact same story as the fairy tale world. Kitsis and Horowitz have called him a "godfather" to the series. Kitsis and Horowitz sought to write strong female characters, rather than the classic damsel in distress. Horowitz stated their desire to approach each character the same way, asking themselves, "How do we make these icons real, make them relatable? Horowitz elaborated, "One of the fun things for us coming up with these stories is thinking of ways these different characters can interact in ways they never have before. After Fables fans raised controversy over possible appropriation, the show writers initially denied a link, but later said they may have "read a couple issues" of the comic book but while the two concepts are "in the same playground", they are "telling a different story. Secondary character casting director, Samuel Forsyth, started the casting process in Horowitz stated that everyone they initially wanted for roles in the series accepted their roles after being sent a script. Goodwin had stated in interviews that she would love to play Snow White, and called her acceptance of the role "a no-brainer. He explained, "Prince Charming just happens to be a name. He gets his hands dirty. He has a family to protect. He has an epic, epic love for Snow White. The Enchanted Forest is a realm within Fairy Tale Land, but the actual spread and scope of the realm is not known. However, they are later united during the Ogre Wars, which played a part in the formation of the War Council that is formed by Prince Charming and served as the catalysts in the backstories involving Rumpelstiltskin and the Evil Queen. Several independent kingdoms are implied by an array of different rulers. Most of the stories detailed their earlier lives before ascension to power and being influenced by their mentors through their upbringings. Meanwhile, Storybrooke serves as an isolated town separated from the rest of the Land Without Magic, where the cursed inhabitants are trapped by various forces. During the seventh season, the New Enchanted Forest [15] is shown as the main setting, alongside with Hyperion Heights, Seattle. The inhabitants are in-conflict with each other, most notably between Lady Tremaine, Cinderella, Drizella, a resistance led by Tiana, and the Coven of the Eight led by Mother Gothel. Most flashbacks shown are involving events happened before the original curse and before the latest curse that brought everyone to Hyperion Heights, where unlike Storybrooke, its cursed inhabitants are living among ordinary people.

This volume was dedicated to the memory of Robert G. Yet he captured the experience perfectly. I had never met him in person, and he had perhaps never attended a BSI dinner in New York, as he had been confined to a wheelchair for many years. Yet dipping into his memories to write this chapter made him decide to come to the next one, and we laid plans to sit together at it. Bell teaches Edgar W. Fairlie Irregularity in the Windy City. Undamaged by the war, capital of financial power unmatched in history, a cultural mecca for America and Europe, New York was now both O. Each day a hundred passenger trains came and went, a dozen ocean liners docked and sailed, a growing fleet of airlines landed and took off. Theaters were full, restaurants were busy, couples spooned in Central Park, and a dozen newspapers vied for attention. Young people, out of the service, or at the outset of their careers, were flooding into New York seeking the fresh, new world awaiting them. There is, first, the New York of the man or woman who was born here, who takes the city for granted and accepts its size and its turbulence as natural and inevitable. Second, there is the New York of the commuter the city that is de-voured by locusts each day and spat out each night. Third, there is the New York of the person who was born somewhere else and came to New York in quest of something. Of these three tremendous cities the greatest is the last – the city of final destination, the city that is a goal. Commuters give the city its tidal restlessness; natives give it solidity and continuity; but the settlers give it passion. And whether it is a farmer arriving from Italy to set up a small grocery store in a slum, or a young girl arriving from a small town in Mississippi to escape the indignity of being observed by her neighbors, or a boy arriving from the Corn Belt with a manuscript in his suitcase and a pain in his heart, it makes no difference: Although a good deal of the talent went into television and Madison Avenue, two burgeoning phenomena despaired over by postwar New York intellectuals, theater was particularly right now, with plays like *Death of a Salesman* and *A Streetcar Named Desire*. Culturally and socially, it was a more democratic New York than it had been. The war had taken the starch out of the old arbiters of taste and status. A thin crowd, a summer-night buzz of fans interrupted by an occasional drink being shaken at the small bar. It is dark in here the proprietor sees no reason for boosting his light bill just because the liquor laws have changed. How dark, how pleasing; and how miraculously beautiful the murals showing Italian lake scenes – probably executed by a cousin of the owner. The owner himself mixes. The fans intone the prayer for cool salvation. From the next booth drifts the conversation of radio executives; from the green salad comes the little taste of garlic. Behind me eighteen inches again a young intel-lectual is trying to persuade a girl to come live with him and be his love. She has her guard up, but he is extremely reasonable, careful not to overplay his hand. A combination of intellectual companionship and sexuality is what they have to offer each other, he feels. In the mirror over the bar I can see the ritual of the second drink. And the fan takes over again, and the heat and the relaxed air and the memory of so many good little dinners in so many good little illegal places, with the theme of love, the sound of ventilation, the brief medicinal illusion of gin. But, at the same time, the mood was different from before the war. The old sense of immunity, of being protected from Old World strife by two great oceans, was gone. New engines of destruction could span them in hours, bombs could incinerate entire cities in a single blast, and the wartime alliance had broken down. Christopher Morley registered it in *The Old Mandarin*, a collection of verse: History, impartial and empiric, Pays off, on average, as man deserves; We have, for being weary and hysteric, Pax neurotica, the Peace of Nerves. Judging from personal comments, as well as from published writings, a number of aficionados share the prevailing apprehension over the appalling possibilities latent in the atomic bomb, which the world must now face though it is no better prepared than it was for the Giant Rat of Sumatra. I therefore offer a suggestion which, if adopted, should deliver us from the Valley of Fear into which we have been thrust by this fantastic Oppenheimer creation. I propose that control of the bomb be

entrusted to the Brothers Holmes: Mycroft to be responsible for the complex and delicate questions of policy and diplomacy, and Sherlock for all investigations into illicit production and for the removal of any would-be Moriarty who may seek to reduce our planet to the size of an asteroid in order to study its dynamics. Labor discontent was sharp, prices were high, there was a great deal of civil rights ferment, and a new Red Scare got underway as the Cold War broke out. Nothing riveted the public more than the Alger Hiss case. In August , before the House Committee on Un-American Activities, a Time Magazine editor named Whittaker Chambers identified himself as a member of the Communist Party underground in the s, and named a number of former and current U. Government officials as secret communists. Hiss came before the Committee to deny the allegations. His poise was perfect, and his credentials impeccable: Only one hesitated to drop the matter, a young California congressman named Richard Nixon. He arranged for a private confrontation between the two men at the Commodore Hotel in New York. Hiss challenged Chambers to repeat his allegations outside the privilege of a Congressional hearing. Alastair Cooke, in his book, called it *A Generation on Trial*: Those who were for Hiss or against him felt their own pride and past political judgment to be at stake. They feared, as the others hoped, that a verdict against Hiss would be a verdict against the New Deal. Whatever Hiss or his lawyers might say later, the House Committee thus succeeded, before he ever came to trial, in making a large and very mixed public identify Hiss with what was characteristic of the New Deal. They had been typed on a machine later proved to have been owned by Alger Hiss. And more evidence emerged in , as first one, then a second trial took place. In January , Hiss was convicted and sent to prison. It was a pro-longed trauma for America, and the outcome licensed, if illicitly, the exploitation of fear embarked upon the following month by a whisky-soaked Senator from Wisconsin named Joe McCarthy. It did not make Harry Truman more popular. It would, said its opponents, mean war. In eastern Europe one land after another fell behind the Iron Curtain. The first permanent draft in U. China was also plunged in civil war, to be won in by the communists. America did something it never had before, commit itself to the security of nations across the sea, by ratifying the North Atlantic Treaty. And the dollar was supreme around the world. But in June , war broke out in divided Korea, with U. Douglas MacArthur took command with one of the great coups in history, his amphibious landing behind enemy lines at Inchon. The Reds were sent hurtling into reverse. When they retreated across the 38th parallel, U. China would not enter the war, MacArthur declared “but in November it did. For every crisis at home or abroad, there seemed to be another just for the Baker Street Irregulars. Christopher Morley declared that the BSI would never hold an annual dinner again. To save it, Edgar W. Smith slashed the invitation list. The BSI incorporated, then badly miscalculated the market for its products. Morley, approaching sixty, was finding himself less inspired as a writer than in the past, and opportunities fewer than they had been. The market for his kind of writing was drying up, and his work as a Book of the Month Club judge was becoming his main source of income. A trip to England in brought home to him how much his place as a man of letters had slipped in America. When the Colophon surveyed subscribers in as to which ten contemporary American writers would be thought great in fifty years, Morley was not among them. He might have been had the survey been taken in Smith simply grew busier. These years saw the „th American car roll off the assembly line, and General Motors was the industry leader by far. These were glory years for GM, which announced for the largest annual profit ever made by an American company “ despite people griping that postwar cars were too long to park, too big for garages, and too much money. Production could not keep up with demand, and there was a waiting list for new cars. There were ways around it, though; Smith helped Morley get a new Pontiac. Despite well over four million bucks in prizes to keep people listening to radio in , about a quarter of the country was watching television. By , there were eight million sets in the land. Thanks to the G. Bill, a million more Americans started college in than before the war. The long dry statistical treatise became a bestseller, was sniggered over on the airwaves daily, and inspired a rash of popular songs. Moralists wondered what was happening to America. Chronology of the Outlander Series The Outlander series includes three kinds of stories: The Big, Enormous Books, aka the major novels in the Outlander series that have no discernible genre or all of them. These are numbered from 1 through 9, below. The Shorter, Less Indescribable Novels that are more or less historical mysteries though dealing also with battles, eels, and mildly deviant sexual practices. And “The Bulgies” These being shorter pieces that fit somewhere inside the story lines of the novels, much in the nature of squirming prey swallowed by a large snake. The shorter novels focus on the adventures of Lord John Grey but intersect with the larger books. The description below explains which characters appear in which stories. The description of each story includes the dates covered in it. The original anthology title and years of publication are also given for each one as applicable.. Chronology of the Outlander Series: In which Jamie Fraser aged nineteen and his friend Ian Murray aged twenty become young mercenaries. Martin and Gardner Dozois, Jamie Fraser also appears in this one. However, his nose throbbed painfully, which he thought odd, in the circumstances. In which, Lord John faces a court of inquiry into the explosion of a cannon, and learns that there are more dangerous things in the world than gunpowder. Martin and Stephen King, which I thought was pretty entertaining; I mean, how often does that happen? This book has four major story lines: The American Revolution is in full roar, and a lot of fairly horrifying things are happening in Scotland in the s, too. The space between what? John Joseph Adams, Lord John, about to leave his post as temporary military governor of Jamaica, learns that his mother is in Havana, Cuba. She was a Five , from Carolina , who was chosen for the Selection , and became one of the Six Elites. She grew up living in the fifth caste in the province of Carolina at their home. America found her trade in music, being talented at singing, piano, violin, and many other instruments. When Kota moved out of the house, America helped him move, thinking he was trying to be independent when he was in fact trying to separate himself from his family. While she was helping Kota, she got to know a Six named Aspen Leger. After careful glances and flirty conversations, Aspen gave her a card on her fifteenth birthday saying to meet him in the tree house at midnight. America went and they both confessed their love for each other. Later, Aspen was the one who encouraged her to sign up for the Selection, not expecting her to be chosen. The Selection Aspen and America had been dating in secret for two years when Aspen encouraged her to enter the Selection. After she heard this, she was filled with joy because she knew Aspen meant to use the money to marry her, and took a beautiful picture despite her worries about the Selection. After America came home she tried to do something heartfelt for Aspen, and chose to make him a full dinner even though she is admittedly not the best cook. As a Six from a large family, Aspen never got enough to eat, a fact that caused America great worry. He worried what would happen to America after she chose to marry him because doing so would force her to move down a caste and give up a relatively stable life with her musical talents for a poverty-filled life as a Six. He realized he could never spoil her and ended the relationship, leaving her heartbroken. America got called for the Selection, to her surprise, and asked him Aspen to help her pack as a way to tell him goodbye. She gave him all her allowance money and the small collection of pennies he has given her as compensation for the songs she sang for him. Aspen refused to take them, but America insisted and ordered him to leave. When he left, America noticed that one penny was stuck to the bottom of the jar in which she stored the pennies and other trinkets Aspen had collected for her over the years. She debated simply leaving it on her windowsill in her room, but changed her mind and decided to pack it at the last minute so that she would have something to remind her of her home and the boy who still had a firm grasp on her heart. After being chosen as one of the Selected , America saw Aspen with another girl, Brenna , who was a Six, when she was leaving for the palace. She got upset and furious that he moved on so quickly, but had already packed the jar with the one penny to bring with her. At the palace, America was clearly not over Aspen, but tried to let him go. While in her room on the first night, America began to feel trapped and ran to the door that led to the expansive palace gardens. Just as America was about to faint, Prince Maxon appeared and ordered the guards to let her go outside. Immediately after they opened the doors, America ran outside and went to sit on a bench. Maxon found her and spoke to her, and the two got to know each other during a brief conversation, which ultimately became an argument. Maxon tried to comfort her, but failed miserably and simply left America outside to grieve. The next day during their first official meeting, the two agree to a "trade": For a time, America seemed to get along fairly well, and formed a close bond with some of the girls, particularly Marlee Tames, an especially kind and cheerful Four from Kent. She liked her maids too: Her biggest problem seemed to be settling her conflicting feelings for Maxon and Aspen, as well as a particularly nasty Selected Two named Celeste Newsome, who believed herself to be above everyone else and desired the crown more than Maxon himself. Many believed her actions to be radical, but she thought nothing of it because she deeply cared for them. Many of the maids, servants, and guards grew especially fond of America after this because they knew she cared for the "little people," not a common trait in the upper class castes. At that point, eliminations sped up much more quickly as girls were fearful and wished to return to their homes, and the royal family wanted to wrap up the Selection as quickly as possible to prevent any harm from coming to the girls. Eventually, America ran into Aspen, who had been drafted and became a palace guard. At the end of the first novel, Aspen promised America that he

would be here as long as she needed him, and that whenever she was eliminated, he would still be there to take care of her when she went home. The Elite America begins to feel as if Maxon will eliminate her, because she saw him through the week dating the other girls. At the Halloween Ball, while dancing, he assures her he still cares about her. Although they could have both gotten into serious trouble if caught, America and Aspen both had secret meetings at the palace whenever they could. America, however, was not sure whether she loved Aspen or Maxon more. As a punishment, the king sentenced them to be caned 15 times publicly and to be stripped from their caste so that they became "the lowest of the low," Eights. America desperately tried to stop the torture the two went through as she believed it to be morally wrong, but was dragged away by several guards before she could intervene. Aspen promised he was proud of her, along with her father. Aspen protected America during a rebel attack in the middle of the night, but during another attack the next day, America was chased into the woods. She managed to outrun them and hide to avoid capture. One young Northern rebel spotted America, when she dropped her books under the tree America had climbed onto. After an hour, Aspen and a group of guards finally found America sleeping by a tree. America was then taken back to the castle and placed in the hospital wing. Maxon visited her after a short while and confessed how worried he was when he thought he lost her. She and Kriss were partnered to host the Italian dignitaries, and their party went over quite well, with the Italian princess Nicoletta insisting America should contact her personally should she need anything. Silvia and the queen both were prized as hostesses, and the guests loved it. When it was broadcast live on The Report, the king was furious and told Maxon he had to "take care of her. Officer Tanner found America and Maxon and lead them to a nearby safe room. America did not leave, however, and instead Natalie went home, because her younger sister Lacey was killed by the rebels. Maxon was able to convince his father to allow America to stay by telling him she supposedly saved his life and got him to safety when he was too weak to go alone. Maxon said that as long as America was on her best behavior, his father would allow her to stay. But he warned her about how King Clarkson would be a little harsh on her. He explained that even though he had told her many secrets and defended her, America acted rashly, and Maxon needed her to have faith in him. After Maxon left for a date with Kriss, America became determined to win the Selection. King Clarkson then came to give her a talking to. He warned her that if she won and became queen, she would ruin centuries of work, and that Maxon should not choose her. He told her not to mention this conversation to Maxon or anyone else. He then became surprisingly happy and said good-bye, as if nothing happened. It did not go over well, as when America tried to seduce him, he simply laughed at her, and she wondered what she could possibly say to remedy things with Maxon and set their relationship back on track. The Rebels assured them that they were not out to destroy the monarchy. In fact, they believed Maxon to be a very good man who would be ten times the king his father was, and America was the candidate whom they backed for princess. In exchange, they promised loyalty to Maxon and protection from the Southern rebels if outfitted with proper weapons. A short time later, the king received word that the rebels are now attacking people by caste, the castes of the four Elites, starting from the Twos and working their way down to Fives. America asked Aspen for help smuggling her and Maxon out of the palace so that they could meet up with August and Georgia, in hopes of getting more information about what was going on outside. Unfortunately, Aspen, Maxon, and Officer Avery were forced to fight off a gang of Southern rebels criminals who wanted to rob them, and were separated from America in the process. She stayed with America until Maxon found her. America wanted to thank the young girl for her help, and asked Maxon to bring her back with them and give her job in the kitchens. Anne and Marlee, who had been working secretly as a kitchen maid in the palace since her caning, stitched America up and cleaned her wound, a non-severe one that healed quickly. Elise, Kriss, and Celeste were all given criminals who had all committed minor crimes, but been given extremely long prison terms, a sign that they were actually enemies of the king. This angered the king immensely, but he had to accept the jewels instead of the prison sentence because the Convicting was broadcast live for the public, and he wanted to uphold his image as a merciful king. Enraged by this offense, Clarkson gave Maxon the option to call the entire Selection off and start a new one, which Maxon ultimately refused because, for all the

trouble she caused him, he knew America was the right girl for him and the right girl to be the queen. Before she could create the commercials, however, she learned that her father had died just hours earlier. Kota revealed just how far his caste-climbing ambitions have removed him from his family. After her elder sister Kenna revealed that she had suspected America and Aspen were together and that she approved, America admitted that she no longer loved Aspen romantically, but thought of him as another brother. Kenna told her that Aspen would always be family for all of them, but she must tell him the truth about her new feelings if she ever truly loved him. America knew Kenna was right and tried to explain things to Aspen on the way back to the palace, but it was too painful. When she returned to the palace, America found out that Kriss and herself were the last two girls standing and that Maxon had invited all of the previously Selected back to the palace to celebrate. America realized that the necklace Kriss was wearing depicted the North Star, revealing that she was also a Northern rebel. They began making out and they ultimately admitted their love for each other aloud for the first time. They undressed, almost to their underwear, while America reassured Maxon that she loved the scars on his back because they were a sign of his love for her: A sudden noise in the hallway stopped them from going any further. Maxon simply slept next to America, both of them feeling safe and loved, confident that they would be able to express their love for each other physically very soon. America tried to explain the situation, but Maxon refused to listen and left in a rage. However, right before Maxon was about to reveal his selection of Kriss, the Southern rebels infiltrated the palace and attacked, killing Celeste and Anne among many people. A rebel attempted to shoot America, but Maxon lunged toward her on instinct to save her life and took a hit below his left shoulder. Close to death, he apologized to America for almost not choosing her, and told her that he loved her to his last breath and that his heart belonged to her to "break it a thousand times if [she] like[s]. He took her to a safe room with the intention of returning and saving the Prince too. When the attack was over and the Southern rebels were defeated with help from the Northern rebels, America was released from the safe room and went to the hospital where she reunited with Aspen, who was alive, though severely wounded. He informed America that Maxon was also alive and now officially the king, as both his parents were killed by the rebels. Aspen confessed to America that he still cared a great deal for her, but was no longer in love with her. Lucy arrived at that moment to see Aspen and greeted him with a kiss. America finally realized their relationship and approved immensely. When America visited Maxon, he told her about his decision to dissolve the castes, an idea inspired entirely by her. His plan would take some time to fully implement, but they could start with the Eights merging with the Sevens and go on from there.

*This complete series of books is one I have recommended many times. I read the series many years ago and did not have this final book. I have not started it as yet since I decided to re-read the others before starting it.*

That was the tragic fate of Antonio Luna, known for his temper and contempt for insect-minded and fake revolutionaries. However, his bravery, intensity, and purity of heart in fighting the Spanish and American colonials in the late 19th century and early 20th century did not surmount the demons of his compatriots and rivals who wanted him more dead than alive. The nightmare began on June 5, , when Capt. Almost lifeless, Luna crawled out of the convent where his two aides, Col. Francisco Roman and Capt. Eduardo Rusca tried to stop the killers. The aides were shot at close range. Rusca survived because he inched back to the church. He was killed at 33, by fellow revolutionaries who were supposed to stop the Americans from taking over the Philippines after the declaration of Philippine independence on June 12, . She was the power behind the throne. His page book pointed out that three important events in Philippine history: The author also praised Luna for being a good writer, a scientist who was published in Europe, and a cosmopolitan who eventually became a nationalist. In the days of the colonial era, Filipinos either rose as heroes or fell as anti-heroes. Power struggle divided them. Most of the time, the villains remained popular, their sins completely covered, and their culpabilities almost forgotten. Before Luna was assassinated, he and Buencamino had an argument on the second floor of the convent. Why was Aguinaldo not around when he sent two telegrams asking Luna for a meeting? Luna slapped a soldier who did not salute him. The hot-headed Luna was angry that Janolino, whom he had disarmed, and Buencamino whom he despised for being pro-American, were around. At the Malolos Congress, when Luna was a lawmaker, he slapped Buencamino and called him a traitor when the latter met with members of an American peace commission. Luna also ordered the arrest of Pedro Paterno. He knew that Buencamino and Paterno were willing to vote for the US-initiated autonomy for the Philippines. Then they drafted the Treaty of Paris in August . A Philippine representative, Felipe Agoncillo, was not allowed to participate in the drafting of the treaty that involved the fate of the Philippines. Members of the revolutionary Philippine Congress ironically formalized the US occupation of the Philippines. When the Philippine-American war began on February 4, , Aguinaldo, although seemingly nonchalant about fighting the US, assigned Luna to lead the battlefield. Janolino, a battalion leader in Cavite, said he would receive orders only from Aguinaldo. Luna almost shot Janolino. Manuel Bernal was arrested, tortured, and killed. Jose, was arrested, released, then assassinated in the battlefield. Several hard-core Katipuneros hunted him down because they believed that he betrayed the cause of the Philippine Revolution, said Jose. But the ilustrados and conservative leaders had nothing to gain from a long anti-US war. Earlier, Apolinario Mabini who wrote three volumes on the Philippine Revolution noted that Aguinaldo could redeem himself only by dying for his country, Jose said. In , during the Commonwealth era, Aguinaldo lost when he ran against Manuel Quezon in a presidential race. He was president at 29, and he died at . Antonio Luna was born on Oct. He grew up in Badoc, Ilocos Norte. His brothers were Manuel, musician; Juan, painter; Jose, doctor; and Joaquin, governor and later senator.
