To achieve this, upgrades to both mines and port facilities are necessary. The project is scheduled for completion by . Additionally to upgrades at the mines and ports, it will also include duplication of existing railway lines and is scheduled for completion in late . To achieve this, the Cape Lambert port capacity will be expanded to handle an additional million tonnes annually. Christmas Creek is scheduled to produce 16 million tonnes of iron ore in its first year of operation. Fortescue plans to reach an annual production of 95 million tonnes of iron ore by , downgraded from an earlier target of million. Japan was the second-most important market with 21 percent, followed by South Korea with 10 percent and Taiwan with 3. In comparison, Europe is a small market for ore from the state, having taken only one percent of the overall production in . Communities in the Pilbara region have seen a large influx of residential and Fly-in fly-out workers which has seen land prices skyrocket and has negatively affected tourism as accommodation has become sparse. Locals in the Pilbara argue that the wealth generated by the local mining industry is passing them by and they are left behind. A lack of accommodation and the unattractive nature of relocating to the "dusty outback" resulted in a majority work force of fly-in fly-out workers, depriving local towns of the benefits of a high-earning permanent population. In , the Australian government began to recognise the land rights of the Indigenous Australians , opening an opportunity for the latter to engage in negotiations with mining companies to press for compensation and for assistance in preserving cultural artifacts. However, some Aboriginals feel short-changed, given the enormous profits made from mining, and also consider the financial benefits and employment opportunities as insufficient compensation for the destruction caused to their habitat. The managing director of Ngarda, Brian Taylor, saw this contract as a positive step, moving Aboriginal people in the region away from government welfare and into permanent employment. Western Australian Aboriginals, in , suffered from an unemployment rate of 14 percent in the state, compared to 3. Rio Tinto also, as of , employs indigenous workers in its Pilbara operations, comprising 6 percent of its overall work force. FMG, under the leadership of Andrew Forrest , is driving a national program which aims to find 50, jobs for indigenous workers in Australia. Companies however lack an understanding of Aboriginal culture , which requires young men to be sent to the bush for up to six weeks to hunt and learn about their culture. Companies are often unwilling to award their indigenous employees this time off to be able to perform these important traditions. Of those, gold and iron ore have been the most dangerous, with 14 fatalities each. Of the 42 fatalities, 29 have occurred at the surface and 13 in underground mining. Iron ore last had a fatality-free year in

Balance Sheets ; Income Statement ; Financial Statement Annual reports are formal financial statements that are published yearly and sent to company stockholders and various other interested parties. Both for-profit and not-for-profit organizations produce annual reports. Annual reports have been a Securities and Exchange Commission SEC requirement for businesses owned by the public since Companies meet this requirement in many ways. At its most basic, an annual report includes: General description of the industry or industries in which the company is involved. Audited statements of income, financial position, cash flow, and notes to the statements providing details for various line items. Some companies provide only this minimum amount of information. Annual reports of this type usually are only a few pages in length and produced in an inexpensive fashion. The final product often closely resembles a photocopied document. For these companies, the primary purpose of an annual report is simply to meet legal requirements. With this in mind, many medium-sized and large companies devote large sums of money to making their annual reports as attractive and informative as possible. In such instances the annual report becomes a forum through which a company can relate, influence, preach, opine, and discuss any number of issues and topics. An opening "Letter to Shareholders" often sets the tone of annual reports prepared for publicly held companies. The chairman of the board of directors, the chief executive officer, the president, the chief operating officer or a combination of these four usually sign the letter on behalf of company management. Some of these letters may run a dozen or more pages and include photographs of the CEO in different poses some even expound on topics that, while perhaps of only tangential interest to stockholders and other readers, are of importance to the CEO. More often, however, these letters are significantly shorter, amounting to 3, words or fewer. In addition, particular events or economic conditions of a given year may be incorporated into the themes advanced in an annual report. Companies also use milestone anniversariesâ€”including industry as well as company anniversariesâ€”in their annual reports. Promoting a long, successful track record is often appealing to shareholders and various audiences, for it connotes reliability and quality. Still other companies have developed a tried-and-true format that they use year after year with little change except updating the data. Employees who today are also likely to be shareholders , customers, suppliers, community leaders, and the community-at-large are also targeted audiences. Employees The annual report serves many purposes with employees. It provides management with an opportunity to praise employee innovation, quality, teamwork, and commitment, all of which are critical components in overall business success. In addition, an annual report can also be used as a vehicle to relate those company successesâ€”a new contract, a new product, cost-saving initiatives, new applications of products, expansions into new geographiesâ€”that have an impact on its work force. Seeing a successful project or initiative profiled in the annual report gives reinforcement to the employees responsible for the success. The annual report can help increase employee understanding of the different parts of the company. The annual report can show employees how they fit into the "big picture. So, like other shareholders, these employees can use the annual report to help gauge their investment in the company. Customers Customers want to work with quality suppliers of goods and services, and an annual report can help a company promote its image with customers by highlighting its corporate mission and core values. Customers are reducing their number of suppliers, and one evaluation criterion is financial strength. They want committed and capable suppliers that are going to be around for the long term. Successful companies today quickly weed out such companies. Sometimes an annual report will even offer a profile of a supplier that the company has found exemplary. Such a profile serves two purposes. First, it rewards the supplier for its work and serves to further cement the business relationship. The Community Companies invariably pay a great deal of attention to their reputation in the community or communities in which they operate, for their reputations as corporate citizens can have a decisive impact on bottom-line financial performance. A company would much rather be known for its sponsorship of a benefit

## DOWNLOAD PDF THE FIRST ANNUAL REPORT OF THE WESTERN TOWN COMPANY

charity event than for poisoning a local river, whatever its other attributes. Many annual reports discuss community initiatives undertaken by the company, including community renovation projects, charitable contributions, volunteer efforts, and programs to help protect the environment. The objective is to present the company as a proactive member of the community. This sort of publicity also can be valuable when a company is making plans to move into a new community. Companies seek warm welcomes in new communities including tax breaks and other incentives. Communities will woo a company perceived as a "good" corporate citizen more zealously than one that is not. The good corporate citizen also will receive less resistance from local interest groups. Generalizations, however, are difficult. The stockholder with five shares might be as careful and discriminating a reader of an annual report as the financial analyst representing a firm owning one million shares. Nevertheless, a good understanding of a company is possible by focusing on some key sections of the report.

**Company Description** Most companies will include a description of their business segments that includes products and markets served. Formats vary from a separate fold-out descriptive section to a few words on the inside front cover. A review of this section provides readers with at least a basic understanding of what the company does. This is often the most widely read portion of the entire annual report, so business owners and managers should make a special effort to make it both informative and engaging. It makes a comparison of the most recent year with prior years. It discusses sales, profit margins, operating income, and net income. Factors that influenced business trends are outlined. Other portions discuss capital expenditures, cash flow, changes in working capital, and anything "special" that happened during the years under examination. This means forsaking jargon and hyperbole in favor of clear and concise communication.

**Financial Summary** Most companies will include a five-, six-, ten-, or eleven-year summary of financial data. This section summarizes key data from the statements of income, financial position, and cash flow for a number of years. This information is helpful for anyone wanting additional data on the company or more information about stock ownership. Many companies also want to be sure, however, that their targeted audiences are going to read and understand the message. In many ways the annual report serves as an advertisement for the company, a reality that is reflected in the fact that leading business magazines now present awards to company reports deemed to be of particular merit. In recent years, companies have also chosen to make their annual reports available in a variety of electronic media that lend themselves to creative, visually interesting treatments. Of course, the personality of the company—and perhaps most importantly, the industry in which it operates—will go a long way toward dictating the design format of the annual report. The owner of a manufacturer of hospital equipment is far less likely to present a visually dramatic annual report to the public than are the owners of a chain of suntanning salons. It allowed companies to produce a summary annual report, rather than the traditional report with audited statements and footnotes. Promoters of the summary annual report see it as a way to make the annual report a true marketing publication without the cumbersome, detailed financial data. Financial data are still included, but in a condensed form in a supporting role. Since its use was approved, however, the summary annual report has not gained widespread support. In some respects, annual reports are like fashions. Certain techniques, formats, and designs are popular for a few years and then new ideas displace the old. Several years later, the old ideas are back in vogue again. Other formats are "classic," never seeming to go out of style or lose their power. A key to a successful annual report is not getting caught up in a trend, and instead deciding what works best for conveying the message. Stittle, John Annual Reports.

Native Americans[ edit ] Before Delaware was settled by European colonists, the area was home to the Eastern Algonquian tribes known as the Unami Lenape , or Delaware, who lived mostly along the coast, and the Nanticoke who occupied much of the southern Delmarva Peninsula. They had a settled hunting and agricultural society, and they rapidly became middlemen in an increasingly frantic fur trade with their ancient enemy, the Minqua or Susquehannock. With the loss of their lands on the Delaware River and the destruction of the Minqua by the Iroquois of the Five Nations in the s, the remnants of the Lenape who wished to remain identified as such left the region and moved over the Alleghany Mountains by the midth century. Generally, those who did not relocate out of the state of Delaware were baptized, became Christian and were grouped together with other persons of color in official records and in the minds of their non-Native American neighbors. The Dutch were the first Europeans to settle in present-day Delaware in the middle region by establishing a trading post at Zwaanendael , near the site of Lewes in Within a year all the settlers were killed in a dispute with area Native American tribes. The colony of New Sweden lasted for 17 years. In the Dutch, reinvigorated by the leadership of Peter Stuyvesant , established a fort at present-day New Castle , and in they conquered the New Sweden colony, annexing it into the Dutch New Netherland. Penn strongly desired access to the sea for his Pennsylvania province and leased what then came to be known as the "Lower Counties on the Delaware" [20] from the Duke. Penn established representative government and briefly combined his two possessions under one General Assembly in However, by the Province of Pennsylvania had grown so large that their representatives wanted to make decisions without the assent of the Lower Counties and the two groups of representatives began meeting on their own, one at Philadelphia , and the other at New Castle. Penn and his heirs remained proprietors of both and always appointed the same person Governor for their Province of Pennsylvania and their territory of the Lower Counties. The fact that Delaware and Pennsylvania shared the same governor was not unique. From to New York and New Jersey shared a governor. The colony became a slave society and cultivated tobacco as a cash crop, although English immigrants continued to arrive. American Revolution[ edit ] Like the other middle colonies, the Lower Counties on the Delaware initially showed little enthusiasm for a break with Britain. The citizenry had a good relationship with the Proprietary government, and generally were allowed more independence of action in their Colonial Assembly than in other colonies. Merchants at the port of Wilmington had trading ties with the British. The British remained in control of the Delaware River for much of the rest of the war, disrupting commerce and providing encouragement to an active Loyalist portion of the population, particularly in Sussex County. Because the British promised slaves of rebels freedom for fighting with them, escaped slaves flocked north to join their lines. Slavery and race[ edit ] Many colonial settlers came to Delaware from Maryland and Virginia, where the population had been increasing rapidly. The economies of these colonies were chiefly based on tobacco culture and were increasingly dependent on slave labor for its labor-intensive cultivation because of a decline in working class immigrants from England. Most of the English colonists had arrived as indentured servants , under contracts to work as laborers for a fixed period to pay for their passage. In the early years the line between indentured servants and African slaves or laborers was fluid, and the working classes often lived closely together. Most of the free African-American families in Delaware before the Revolution had migrated from Maryland to find more affordable land. They were descendants chiefly of relationships or marriages between white servant women and enslaved, servant or free African or African-American men. As the flow of indentured laborers to the colony decreased with improving economic conditions in England, more slaves were imported for labor and the caste lines hardened. By the end of the colonial period, the number of enslaved people in Delaware began to decline. In addition local Methodists and Quakers encouraged slaveholders to free their slaves following the American Revolution, and many did so in a surge of individual

manumissions for idealistic reasons. By three-quarters of all blacks in Delaware were free. By , the largest slaveholder owned 16 slaves. By the census on the verge of the Civil War , Spencer built a church in Wilmington for the new denomination. In , Spencer called for the first annual gathering, known as the Big August Quarterly , which continues to draw members of this denomination and their descendants together in a religious and cultural festival. Delaware voted against secession on January 3, , and so remained in the Union. While most Delaware citizens who fought in the war served in the regiments of the state, some served in companies on the Confederate side in Maryland and Virginia Regiments. Delaware is notable for being the only slave state from which no Confederate regiments or militia groups were assembled. Delaware essentially freed the few slaves that were still in bondage shortly after the Civil War, but rejected the 13th , 14th , and 15th Amendments to the Constitution; the 13th Amendment was rejected on February 8, , the 14th Amendment was rejected on February 8, , and the 15th Amendment was rejected on March 18, Delaware officially ratified the 13th, 14th, and 15th amendments on February 12,
