

Chapter 1 : About the Movie - The Color of Rain | Hallmark Movies and Mysteries

The Color of Rain. TV With help from a young girl and a widower, a something woman finally grows up and takes on the real world. Sensing the.

Silver or Grey The Meaning of Color in a Dream This article contains a list of possible meanings of each color in a dream. It cannot be emphasized enough that the meaning of the color in the dream is related to the objects that have the color, the quality of the color is the color vibrant or muted? A dream of bright pink lipstick would have a much different meaning than a dream of a bright pink knife. Dreaming of bright pink has one meaning if it is your favorite color and an entirely different meaning if you absolutely despise that hue. It is important to note that dreams can mean so many things to each individual and could even mean more than one thing within the same dream. It is common for dreams to be layered; a symbol may relate to something that occurred during the day, to our subconscious, to our spiritual growth, and to events in our childhood influencing our beliefs, thoughts, and behavior now. In other words, dreams rarely have only one specific meaning. Dreaming of Red Red typically represents feelings of passion, anger, aggression, power, impulsiveness, or a sense of danger. Red is typically associated with blood. It could symbolize life for some while others may view red as a symbol of death. It is important to determine if the dream is showing high energy or loss of energy. Red is also associated with the root chakra located at the base of the spine. For some, the color red may relate to chakras and symbolize earth, grounding oneself, the physical body, survival, and physical health. Maroon is associated with warriors, heroism, strength, bravery, and courage. A red alligator could mean the dreamer is threatened by his urges and instinctual nature. Source Dreaming of Pink Pink is a combination of red and white. It is an innocent version of red. Pink represents love, sweetness, happiness, kindness, romance, compassion, softness, and affection. It is associated with femininity and could also be associated with being in young love or the healing powers of love and friendship. Hot pink or magenta may represent feelings of lust and have a sensual undertone, like the color red. Pink may also have negative connotations, especially if the dreamer dislikes pink. It can be a color of immaturity and weakness. Dreaming of pink consistently may represent issues of dependency or unresolved issues with parents. Finally, some may associate pink with getting a pink slip or getting fired from a job. Pink is associated with the heart chakra or the fourth chakra. Some may associate pink with universal love and caring for others. Pink lipstick in a dream could emphasize the need to verbally express caring and affection. Source Dreaming of Orange Orange is typically associated with warmth, friendship, and other positive sun-related symbols such as a new dawn. Orange is a stimulating color. Bright orange gives a sense of vitality and optimism; it is the color of newness due to its association with the sun and a new day, new outlook. For some, orange symbolizes the sacral chakra located in the lower abdomen. This chakra is associated with sexual desire, pleasure, procreation, and fertility. Peach is similar to orange but is much softer. Eating an orange in a dream may mean the dreamer is taking in new ideas and giving themselves what they need for new growth. Source Dreaming of Yellow The quality of yellow and the context in which this color appears is important. It could have a negative or positive meaning, depending upon the dream. In general, yellow is found to be a mentally stimulating color which is why many offices and classrooms use this color. Most individuals connect yellow with the sun. This meaning may also show that the dreamer has a weakness in areas associated with the third chakra. A yellow butterfly may mean a dreamer is experiencing a mood transformation or a more positive and defined sense of self. Source Dreaming of Gold Gold is similar to yellow and silver but is associated with richness in life or spirit and enhancing the true self who you truly are beyond the conscious ego or developing the psyche. The object is important. Golden fruit could symbolize the rewards we reap after facing our unconscious and taming those aspects of self that have become wild and aggressive through periods of neglect, ultimately integrating them back into our sense of self and our waking life. A gold coin in a dream may mean the dreamer is rich in virtues and inner strength. Source Dreaming of Green Green is commonly associated with nature, mother earth, good health, growth, fertility, healing, vitality, and serenity. Many dreamers may also associate green with a traffic light, making green a symbol telling them to go or allowing them to make a move. Green may represent being

new to something or lacking experience. Green is also associated with the fourth chakra. This chakra is associated with love, compassion, and healing. A green beverage may show the need for rejuvenation or the concept of loving self in order to love others. Source Dreaming of Blue Blue tends to be a very spiritual color for most dreamers. Blue often represents truth, heaven, tranquility, peace, intuition, and whatever the dreamer associates with sky or ocean. Blue could even signify the desire for a vacation! The color can represent the collective conscious see information on Carl Jung or the subconscious. Blue is often associated with boys and could represent masculinity for the dreamer. Different shades of blue can have very different meanings. Navy blue often means conformity and a lack of individualism since this color is typically associated with uniforms. Dark or washed-out blue may indicate depression and feelings of sadness. Blue may also be associated with the fifth, throat chakra. This chakra is associated with communication, self-expression, thinking, and planning. Navy uniforms may warn the dreamer he is losing his individuality and feels lost amongst societal pressures. Source Dreaming of Purple Purple often represents devotion, loving kindness, compassion, and healing abilities. In contrast, purple can also mean royalty, richness, highest rank, social power, and elitism. Peep purple often represents mystery. Psychologically, this color could mean the dreamer is beginning to have awareness of an undiscovered dimension of self. Violet is a shade of purple that can have a more spiritual meaning. It tends to still be associated with affection, charm, intimacy but is also associated with intuition, spirituality, religious aspirations, peace, and spiritual cleansing. The sixth chakra is associated with intuition, spiritual abilities, seeing beyond the physical, and psychic abilities. The seventh chakra is associated with our link to spirituality or God. It should be noted an active seventh chakra is associated with the color white. A purple handprint could mean a healing touch or spiritual impression. Source Dreaming of Black Black symbolizes mystery, the unknown, and the unconscious. These aspects can either be negative or positive. Negative meanings include danger, emptiness, evil, death, mourning, hatred, despair, deep depression, lack of energy, and lack of love. Positive meanings include exploration of the unknown, a blank slate, change, and hidden potential or possibilities. Dreaming of White White represents purity, innocence, cleanliness, new awareness, new beginnings, happiness, clarity, and peace. In Eastern cultures, white represents death and mourning. Off-white or ivory may represent impurities or a blemish in something the dreamer one believed or expected to be perfect. A bride in white may represent innocence and purity yet may also represent false appearances. Source Dreaming of Brown Brown represents the ground and the earth. It could mean practicality, domesticity, the physical, instinctual, or materialistic. Dreaming of the color brown may mean the dreamer needs to get back to basics, become more grounded, or explore their roots or the root cause of an issue. The color could also represent having a neutral or unbiased position or opinion. A bare foot could symbolize the need to strip all pretenses and take an unbiased position on an issue. Source Dreaming of Silver Silver, like gold, often means the object of this color is personally valuable to the dreamer. Silver is also associated with the moon, femininity, intuition, protective spiritual energy, and the unconscious. Gray typically indicates fear, depression, old age, death, social isolation, feeling under the weather, indecisiveness, and confusion. Since dreaming of black and white tends to represent rigid, inflexible thinking, gray may represent blurred lines and loss of direction. Finding an ancient silver object may indicate the dreamer is rediscovering something precious that lies within. This could be a special aspect of self that the dreamer has not integrated into his self image.

Chapter 2 : The Girl on the Train () - IMDb

Nice one from The Cowsills. The real song title is, "The Rain, The Park and Other Things".

Variations Double rainbows "Double rainbow" redirects here. For other uses, see Double Rainbow. Also note the pronounced supernumerary bows inside the primary bow. In theory, all rainbows are double rainbows, but since the secondary bow is always fainter than the primary, it may be too weak to spot in practice. Secondary rainbows are caused by a double reflection of sunlight inside the water droplets. As a result of the "inside" of the secondary bow being "up" to the observer, the colours appear reversed compared to those of the primary bow. The secondary rainbow is fainter than the primary because more light escapes from two reflections compared to one and because the rainbow itself is spread over a greater area of the sky. Each rainbow reflects white light inside its coloured bands, but that is "down" for the primary and "up" for the secondary. A "normal" secondary rainbow may be present as well. Twinned rainbows can look similar to, but should not be confused with supernumerary bands. The two phenomena may be told apart by their difference in colour profile: The cause of a twinned rainbow is the combination of different sizes of water drops falling from the sky. Due to air resistance, raindrops flatten as they fall, and flattening is more prominent in larger water drops. When two rain showers with different-sized raindrops combine, they each produce slightly different rainbows which may combine and form a twinned rainbow. That small difference in droplet size resulted in a small difference in flattening of the droplet shape, and a large difference in flattening of the rainbow top. These requirements are not usually met when the viewer is at ground level, either because droplets are absent in the required position, or because the sunlight is obstructed by the landscape behind the observer. From a high viewpoint such as a high building or an aircraft, however, the requirements can be met and the full-circle rainbow can be seen. In the right circumstances, a glory and a circular rainbow or fog bow can occur together. Supernumerary rainbows Contrast-enhanced photograph of a rainbow with additional supernumerary bands inside the primary bow In certain circumstances, one or several narrow, faintly coloured bands can be seen bordering the violet edge of a rainbow; i. These extra bands are called supernumerary rainbows or supernumerary bands; together with the rainbow itself the phenomenon is also known as a stacker rainbow. The supernumerary bows are slightly detached from the main bow, become successively fainter along with their distance from it, and have pastel colours consisting mainly of pink, purple and green hues rather than the usual spectrum pattern. The alternating faint bands are caused by interference between rays of light following slightly different paths with slightly varying lengths within the raindrops. Some rays are in phase , reinforcing each other through constructive interference , creating a bright band; others are out of phase by up to half a wavelength, cancelling each other out through destructive interference , and creating a gap. Given the different angles of refraction for rays of different colours, the patterns of interference are slightly different for rays of different colours, so each bright band is differentiated in colour, creating a miniature rainbow. Supernumerary rainbows are clearest when raindrops are small and of uniform size. The very existence of supernumerary rainbows was historically a first indication of the wave nature of light, and the first explanation was provided by Thomas Young in Their names are slightly different. A reflected rainbow may appear in the water surface below the horizon. The reflected rainbow is frequently visible, at least partially, even in small puddles. A reflection rainbow may be produced where sunlight reflects off a body of water before reaching the raindrops see diagram and [1] , if the water body is large, quiet over its entire surface, and close to the rain curtain. The reflection rainbow appears above the horizon. Due to the combination of requirements, a reflection rainbow is rarely visible. Up to eight separate bows may be distinguished if the reflected and reflection rainbows happen to occur simultaneously: The normal non-reflection primary and secondary bows above the horizon 1, 2 with their reflected counterparts below it 3, 4 , and the reflection primary and secondary bows above the horizon 5, 6 with their reflected counterparts below it 7, 8. Monochrome rainbow Unenhanced photo of a red monochrome rainbow Occasionally a shower may happen at sunrise or sunset, where the shorter wavelengths like blue and green have been scattered and essentially removed from the spectrum. Further scattering may occur due to the rain, and the result can be the rare and dramatic monochrome or red rainbow. The order of a

rainbow is determined by the number of light reflections inside the water droplets that create it: One reflection results in the first-order or primary rainbow; two reflections create the second-order or secondary rainbow. More internal reflections cause bows of higher orders— theoretically unto infinity. Nevertheless, sightings of the third-order bow in nature have been reported, and in it was photographed definitively for the first time. Felix Billet depicted angular positions up to the 19th-order rainbow, a pattern he called a "rose of rainbows". Up to the th-order rainbow was reported by Ng et al. Rainbows under moonlight

Main article: Moonbow Like most atmospheric optical phenomena, rainbows can be caused by light from the Sun, but also from the Moon. In case of the latter, the rainbow is referred to as a lunar rainbow or moonbow. They are much dimmer and rarer than solar rainbows, requiring the Moon to be near-full in order for them to be seen. For the same reason, moonbows are often perceived as white and may be thought of as monochrome. The full spectrum is present, however, but the human eye is not normally sensitive enough to see the colours. Long exposure photographs will sometimes show the colour in this type of rainbow. Fog bow

Fog bow Fogbows form in the same way as rainbows, but they are formed by much smaller cloud and fog droplets that diffract light extensively. They are almost white with faint reds on the outside and blues inside; often one or more broad supernumerary bands can be discerned inside the inner edge. The colours are dim because the bow in each colour is very broad and the colours overlap. Fogbows are commonly seen over water when air in contact with the cooler water is chilled, but they can be found anywhere if the fog is thin enough for the sun to shine through and the sun is fairly bright. They are very large—almost as big as a rainbow and much broader.

Circumhorizontal and circumzenithal arcs A circumhorizontal arc bottom , below a circumscribed halo

Circumzenithal arc The circumzenithal and circumhorizontal arcs are two related optical phenomena similar in appearance to a rainbow, but unlike the latter, their origin lies in light refraction through hexagonal ice crystals rather than liquid water droplets. This means that they are not rainbows, but members of the large family of halos. Both arcs are brightly coloured ring segments centred on the zenith , but in different positions in the sky: The circumzenithal arc is notably curved and located high above the Sun or Moon with its convex side pointing downwards creating the impression of an "upside down rainbow" ; the circumhorizontal arc runs much closer to the horizon, is more straight and located at a significant distance below the Sun or Moon. Both arcs have their red side pointing towards the sun and their violet part away from it, meaning the circumzenithal arc is red on the bottom, while the circumhorizontal arc is red on top. Droplets or spheres composed of materials with different refractive indices than plain water produce rainbows with different radius angles. Due to a much higher refractive index, rainbows observed on such marbles have a noticeably smaller radius. The displacement of the rainbow due to different refractive indices can be pushed to a peculiar limit. For a material with a refractive index larger than 2, there is no angle fulfilling the requirements for the first order rainbow. For example, the index of refraction of diamond is about 2.

Chapter 3 : International Order of the Rainbow for Girls - Wikipedia

The Girl Who's Walking in the Rain. I waited for her at Theater Row. She's wearing the same lipstick as the last time I saw her, the color of the withering roses in those French romantic movies.

What is the meaning of a Rainbow? Rainbows speak directly to our heart and soul, filling us with awe and energies of liquid love pouring all around us. Rainbows bring the promise that the troubles of today will surely come to pass, hold strong in your faith and vision and the rainbow will bring fresh beginnings, and new prosperity. A symbol of Magical Blessings The Rainbow is also an extraordinary symbol of following our hearts desire and purpose The end of the Rainbow signifies a pot of gold and the magic that surrounds your dreams coming true, and the end of the rainbow is the enchanted magical land of leprechauns. Rainbow symbolism has such a powerful meaning to each of us and graciously bestows the energy of blessings. The symbolism of a Rainbow intuitively tells us to hold onto hope, to believe beyond a shadow of a doubt that sacred blessings open to us when we are following our hearts desire. And the symbol of the Rainbow tells us that we are guided to our hearts desire when we open to spirit to let it guide us. Be true to yourself and your dreams and know that the Universe is conspiring on your behalf. This also tells you that your intuition is keener than you might have imagined The Colors of a Rainbow The rainbow is comprised of 7 colors. The order of colors of a Rainbow is red, orange, yellow, green, blue, indigo, violet. This is the same color order as the color of Chakras, and the colors on a color wheel. Understanding the meaning of the colors , can be very helpful in knowing the significance of the deeper meaning of Rainbow symbolism, and the message it has for us at the time it appears for us. I just love rainbows! The other day a rainbow was reflected off of my aquarium and the rainbow ended on my dining room floor I have always wanted to find the end of a rainbow! Alas, there it was As soon as I saw it I jumped into it with the delight of a child I stood there for several minutes, just absorbing the rays. And the colors were brilliant These close encounters tell us that Spirit is gently reminding us to stay on our path and not get distracted or be in a rush From Ancient Norse legend and mythology comes the story of the Rainbow Bridge. This a story of the immense love and enduring bond of pets and people. Pets have taught us a special kind of love, love with no judgement, just pure acceptance and joy to be with one another. This story has been kept alive because of how we feel about our pets, how we miss them after they pass, and how we long to have them at our sides again. This story of the Rainbow Bridge touches our hearts with assurance that our pets are waiting to be united with us. The Rainbow Bridge connects Heaven and Earth, it is bright with the colors of the rainbow, and just as you near the bridge, there your pets await you in this very special land. And so the legend goes. When an animal dies that has been especially close to someone here, that pet goes to Rainbow Bridge. There are meadows and hills and valleys with lush green grass and fields of flowers and greens for all of our special friends, so they can run and play together. There is plenty of food and water and sunshine, and our friends are warm and comfortable with many places to nestle as they dream and sleep. The animals are happy and content, except for one small thing. They miss someone very special to them, who had to be left behind. They all run and play together, but the day comes when one suddenly stops and looks into the distance. The bright eyes are intent, the nose twitches and the eager body quivers, excitement fills their being. Suddenly, this one breaks away from the group, leaping, and racing over the green grass, legs carrying them faster and faster. YOU have been spotted. The happy kisses rain upon your face. Your hands again caress the beloved head and you look once more into the trusting eyes of your pet Then, you cross the Rainbow Bridge together

Chapter 4 : The Color of Rain | Hallmark Movies and Mysteries

The Color of Rain. Starring Lacey Chabert & Warren Christie. About the Movie Meet the Cast When Gina loses her husband on Christmas Day, she soon finds a kindred.

Then, in the middle of a beautiful daydream, out they sprang. People came from far and wide. She fluttered her wings to show them just how splendid they were, how they shone like rainbows in the sun. And every time the girl gave the same reply. She fluttered her wings to show the boy how they shone like rainbows in the sun. But before the sunlight could catch her wings, a large rain cloud appeared and blocked out the light. She folded away her wings quickly. The girl noticed both. They ran into her house. The girl gulped down her cake, but the boy just nibbled at his as he looked out of the window. They drank more lemonade and ate more cakes. The boy asked the girl questions about her wings. It was a lovely daydream. She listened to the rain against the window. The girl was getting tired. The girl dropped her cake. The boy stood up. He eased his jacket from his shoulders. Out sprang a pair of wings. She had tried so many times, so many secret attempts, but â€¦ She was about to protest, when her mother placed a warning hand on her shoulder. The sunlight bounced from them making shimmers like the surface of a lake. From every shimmer sprang a rainbow. The boy put out a hand to touch one of her beautiful wings. The girl jumped back. The girl saw the sadness in his eyes. And the boy saw the sadness in hers. She lowered her head. The boy grabbed her hand. Then he stood still. He closed his eyes and smiled. The tips of his wings began to flutter. The rest of his wings began to flutter and â€¦ up he went. The girl jumped up and down too. Her wings fluttered and fluttered, then stopped. The boy flew down, landing neatly at her side. I did it again, and it worked. So the girl shut her eyes and smiled, just as the boy had done. Not even a tiny flutter in the tip of her wings. How on earth could I think like you?

Chapter 5 : Girl In Rain Stock Photos. Royalty Free Girl In Rain Images

In my dream i saw night sky and light rain, which poured in vibgyor format. The colour came one after another (first came violet light rain then came indigo light rain like this). It was actually light that came upon me as rain(it wasn't water) as I actually did not get wet.

History[edit] The order came into existence in , [1] when the Reverend W. As the Order of DeMolay had come under his close study during his Masonic activities, he suggested that a similar order for girls would be beneficial. The original name was "Order of the Rainbow for Girls". Each requires some memory work and all but two serve for one term four or six months out of the year, depending on Assembly bylaws. Some offices are elected by the other girls in the assembly. There are also two offices that are elected in January but serve a full year which are Treasurer and Recorder. Presides over a meeting in the absence of the Worthy Advisor Charity Teaches about charitable deeds Hope Teaches that hope is always there for us Faith Teaches that faith is our constant companion. However, this is not a guarantee. An Advisory Board of seven to fifteen adults consisting of at least two Master Masons and two members of the Order of the Eastern Star, members of the sponsoring body ies , and Majority Members, aid in the supervision of the Assembly. Almost all of the Assembly work is done by the girls, with the advisors in support roles only. Grand Representatives may also be PWAs, but it is not mandatory. The Grand Cross of Color is the highest award given to a member or adult leader for outstanding service. Recipients of the award Masters of the Grand Cross of Color are expected to meet once per year for a special service. For every 3 new members, one girl may be chosen to receive the Grand Cross of Color for service rendered above and beyond what is expected for Rainbow. The Grand Cross of Color may also be awarded to adults that serve the assembly, but there may be no more adults than girls that are nominated. New members are elected by current members. The House of Gold consists of the Supreme Officers paralleling a local Assembly , Supreme Inspectors chief advisor for a jurisdiction , and several others making up a total of The current Supreme Inspector chooses the person whom they believe can best associate with the girls of their jurisdiction. That person will become the next Supreme Deputy. There are 50 seats in the House of Gold, and they are lifetime appointments. Locations[edit] Assembly banner The International Order of the Rainbow for Girls has Assemblies in 46 states in the United States as well as in several other countries.

Chapter 6 : Best Rainbow Poems

The Girl Saw Colours. The prism has been letting out too many colours of late. Some bright enough for my eyes to notice, some beautiful, some dark and some not so nice!

Chapter 7 : Rainbow - Wikipedia

In The Girl Who Heard Colors, Jillian is a young girl who loves to explore the world around her. She's just like any other child, except that she sees colors when she hears sounds. As in Kevin Henkes' Chrysanthemum, Jillian loves this special part of herself until other kids at school make fun of her.

Chapter 8 : How to Remember the Order of the Rainbow Colors | Owlcation

The Girl on the Train is the story of Rachel Watson's life post-divorce. Every day, she takes the train in to work in New York, and every day the train passes by her old house. The house she lived in with her husband, who still lives there, with his new wife and child.

Chapter 9 : The Book Thief: The Book Thief Summary & Analysis | CliffsNotes Book Summary

Rainbow Quotes. Quotes tagged as "It takes sunshine and rain to make a rainbow. There would be no rainbows without

sunshine and rain." caught, colors.
