

Chapter 1 : The Hawk and the Dove (book) - Wikipedia

"The Hawk and the Dove is timeless in its portrayal of the many nuances of human nature. While portraying the disciplines and austerity of the pre-Reformation monastery, this series is yet warm and beautiful, lighted with an unforgettable ambience.

Created by Steve Ditko and Steve Skeates, [2] Ditko plotted only the first issue and left after the second. A lot of changes would happen after I turned in a script. Quite often, my idea of what to do with the Dove was have him do brave stuff " and then it would be changed by either Dick [Giordano] or Steve into the Hawk doing that stuff. They seemed to be equating Dove with wimp, wuss, coward or whatever. The original Hawk and Dove made sporadic appearances in different DC titles throughout the s and s, primarily within the Teen Titans and New Teen Titans, joining the original incarnation briefly from Teen Titans vol. Skeates also provided scripts for some of these issues they appeared in. The brothers also teamed up with Batman in The Brave and the Bold vol. In , Karl Kesel and Barbara Kesel began collaborating on a revival of Hawk and Dove, with the idea of creating a second Dove, who would this time be a female that would later become Dawn Granger. I always liked Hawk and Dove. Then it hit me: The mysterious voice that gave Hawk and Dove their powers could easily give the Dove powers to someone else! I called Barbara as soon as I could. She sparked off the idea instantly and before even we knew it, we were co-writers. Despite its strong start, the relaunched ongoing was eventually cancelled after 28 issues and two Annuals, with No. Cover art by Steve Ditko. They eventually found out that their father had many enemies when he was nearly assassinated. Hank and Don eventually follow the criminal back to the hideout where they accidentally locked themselves in the closet of some criminals plotting to dispose of him. Just as Hank and Don who found for the first time they could agree that they wanted to save their father, mysterious voices echoed throughout the room offering the boys a chance to save their father. All they had to do was call upon the powers of the Hawk and the Dove. The Hall brothers invoked their new powers and became Hawk and Dove. The conservative Hawk Hank was hot-headed and reactionary, whereas the liberal Dove Don was more thoughtful and reasoned, but was prone to indecisiveness. Judge Irwin Hall displayed a more balanced political beliefs, and firmly disapproved of vigilantism , not knowing his sons were costumed adventurers and the fact that Hawk and Dove had saved him from his would-be assailants. Writer Alan Brennert attempted to end their saga in a issue of The Brave and the Bold where 12 years later Hank and Don Hall, then adults, are trying to cope with their s values in the s. This was later intentionally disregarded with a joke where Don notes everyone says they look older in New Teen Titans No. The creature that killed Dove came from behind while he was saving a kid from a falling building and Hawk was too far away to intervene. Hawk continued on his own, but without Dove to restrain him, he became violent to the point where many superheroes considered him nearly as much trouble as the supervillains. Modern Age[edit] Hawk and Dove: Artwork by Rob Liefeld. The new Dove mysteriously received her powers while attempting to save her mother from terrorists. At the end of the mini-series, it was revealed that Dawn received her powers the moment Don had been stripped of them. This Dove, while considerably more aggressive and self-confident than Don, also has greater-than-average strength and dexterity, faster-than-human speed, and expanded mental capabilities. Dove fights mostly defensively, preferring to out-think and remain in control of her opponent. She also heals quickly and cannot revert to Dawn if her wounds or some other condition would be fatal to Dawn. Set in Washington, D. They also worked with police Captain Brian "Sal" Arsala, who would develop a mutual admiration with Dawn. Exotic Goods and Services. This merging enhances their powers: Dove could now fly and was stronger and bulletproof; and Hawk now had super strength and was nearly invulnerable. Armageddon , Zero Hour, and JSA[edit] In , in an editorial snafu concerning the mini-series Armageddon , word leaked out that the central time-travelling villain of the piece known as Monarch was actually Captain Atom. Monarch had originally been conceived as a future identity of Captain Atom post-psychotic break. In a last-ditch effort to provide a "surprise twist", DC changed the storyline. Monarch attacked Hawk and Dove and managed to murder Dawn in front of Hank, causing him to suffer the psychotic break, kill Monarch, and assume his villainous identity. Despite his crimes

and the lives taken by him, a statue of him is present in the Titans Tower memorial in San Francisco. They gained large bird wings and a telepathic link by receiving experimental medical treatments as children. Following the mini-series, the new Hawk and Dove made a handful of cameo appearances in Titans-related books, once protecting the town of Woodstock, New York, during a worldwide crisis. Holly and Dawn Granger [edit] Hawk and Dove: Art by Mike McKone. In , JSA 45â€”50 told of a mysterious woman in a coma who was taken into the care of the Justice Society. Dawn later gained a new partner when her estranged and aggressive British sister, Holly Granger, was granted the mystical powers of Chaos, becoming the third Hawk. Hawk and Dove also appeared in Countdown to Mystery , in which Dawn Granger is one of a number of heroes possessed by Eclipso. In Teen Titans vol. Their association with the team was temporary, though they resurfaced in the Titans East Special as part of a new team organized by Cyborg. The sisters were both shot by energy beams from Trigon and were left for dead. Later events showed they were badly injured but had survived the experience. Titans 1, Hank lures Holly and Dawn to a library with a trail of dead hawks and doves. Holly and Hank catch up to her and resume their attack. The effort causes Dawn to pass out. While unconscious, she has a vision of Don, who tells her that she can save Hank, and should not give up on him. She is able to destroy Black Lanterns with her very presence. Dove aids the seven Corps members to defeat the cosmic entity before resuming their battle with the Black Lantern Corps. They have him, in their own particular ways, try to resurrect Don and Holly, but to no avail; [1] [18] the voice guiding Deadman simply indicates death no longer holds the same meaning. When Deadman asks the white battery why they were all brought back to life, the Entity tells them that it is dying and requires a successor. The Entity also tells Hawk to save Dawn from Captain Boomerang although the fact that it also told Boomerang to attack Dawn in the first place suggests a larger plan at play. When asking why Dove needs to be protected, the Entity said they all need protection. They believe Resurrection Man and Batman to be possible candidates, [23] and Deadman tries to give the ring to Batman, but the ring rejects him and returns to Deadman, who is suddenly shot to death. Hawk fails to catch it, but Deadman succeeds, dying in the process. Hawk is left to knock Captain Boomerang unconscious. After the Dark Avatar is defeated, the Entity reveals to them that the boomerang was a part a plan to free Hawk from his role as an avatar of war from the Lords of Chaos: She and Boston Brand share an emotional farewell as Brand resumes his duties as "Deadman". Immediately after their meeting with Zinda, the two are called in by Oracle to rescue Black Canary and the Huntress from a villainess calling herself White Canary. They encounter Condor and Swan, a new pair of supervillains who possess superpowers similar to theirs. Swan escapes, but Hawk and Dove manage to defeat Condor, who is revealed to be an old unnamed man. This is later retconned in the Titans Hunt mini-series, where it is revealed that Hank and Don were members of the original Teen Titans, and that Don was killed during a battle between the team and Mister Twister. The Hawk and Dove series was canceled after issue 8 released 4 April When in the presence of danger, whether to herself or others, Dawn Granger can call out the word "Dove" and transform into Dove. She does not need to be aware of danger, meaning she transforms if she says the word while unknowingly being in danger. However, the transformation requires actual danger, so if Dawn says "Dove" without danger being present, she would not transform. The transformation wears off a short time after any danger has passed, unless Dove is seriously injured. She will remain as Dove until the injuries are sufficiently healed. Hank once searched the warehouse district to find a criminal hideout, having to say "Hawk" before entering each warehouse. On high magic worlds, Dawn can remain as Dove for extended periods regardless of whether danger is present. The transformation changes Granger into a minor force of Order and she gains avian characteristics, which are hidden under her costume. If the costume receives sufficient damage, it can reveal part of her true form, which shines with the golden glowing light of Order. Within realms of higher magic, Dove can easily remove the costume and show her true form. Dove is also hypervigilant; her natural aptitudes are enhanced, such as her ability to judge people which allows her to "read" people and objects, and know how they will behave. In addition to flight, she also has enhanced agility, can withstand physical punishment, heal quickly and her perceptions are heightened to their fullest extent. Due to her connection with Terataya, on high magic worlds her powers are enhanced. She can concentrate her radiance into a blinding beam of light. She also possesses the White Light of Creation. How and why Dawn was chosen for this power, or whether it has

anything to do with her link to Terataya, remains unknown. As seen in the pages of Blackest Night, Don Hall is impervious to black power rings. But really it speaks to the nature of Don Hall. While he was a member of the Black Lantern Corps, Hawk wielded a black power ring which allowed him to generate black energy constructs. He was also able to perceive emotional auras. Enemies[edit] Outside of the enemies they fought with the Teen Titans, each of the Hawk and Dove incarnations had their own enemies. Condor " The evil counterpart of Hawk. Necromancer " A powerful sorceress who tried unlocking unlimited magical power with the circle of totems. Shellshock " A mysterious woman who can blow up anything by saying its name. Sudden Death " A beach bum-themed metahuman.
