Chapter 2 : Heresy30K - The Horus Heresy Blog: Horus Heresy Book Five - Tempest

The Horus Heresy Book Five - Tempest The new Horus Heresy book is coming and it is all about Calth! The "Tempest" seminar was all about the new book.

Siege of Terra Following the Siege of Terra, Horus was permakilled, Big E was interred onto the Golden Throne, the surviving primarchs freaked out trying to figure out what do now that daddy was in a coma, the traitors fucked off into the Eye of Terror, and overall the galaxy slowly and collectively lost their minds now that their wise and all-powerful ruler was no longer around to tell them what to do. Ahem, as he was saying, The more recent edition was published by Fantasy Flight Games. Also a two-player war game , it includes over sculpted minifigs, sculpted buildings, and even Horus and the Emprah themselves are units on the board. Combat is less dice-y and more card-y. Not to be confused with the lame Horus Heresy card game, whose only saving grace was the awesome card art that would appear in the Horus Heresy artbooks anyway. The Main Book Series[edit] For the last decade, Black Library has been publishing novels that explore the events of the Horus Heresy, looking at the rivalries among the Primarchs and exploring just why everything went down the tubes. The novels are by a selection of different authors, which is a total pain if you like to organise your books alphabetically by author. The reception to the series has been somewhat This article contains spoilers! You have been warned. Books I - X[edit] Horus Rising: A prologue story, introducing us to the series and Garviel Loken who will grow into a very significant character. An Emperor not Him is killed at the beginning and some bugs are killed on a planet called Murder for no reason other than they were there. The Interex show up and ask "whadya do that for? It is worth noting that if the Interex had some goddamn CCTV set up in their museum of awesome and valuable weapons then the whole heresy could possibly have been avoided. Isstvan III happens and the traitors send the loyalists down to the planet without reinforcements and proceed to bomb them to fuck. There is also the very first canonical appearance of Plague Marines, Euphrati Keeler being all mystical and shit, and Malcador recruiting Garro as the first Knight-Errant. In short Fulgrim finds a sword, gets possessed, kills Ferrus Manus - the end. What beautiful music they make. Luther gets sent home with Zahariel to hustle up more Dark Angels. Legion introduces the Cabal , the Perpetuals and Omegon. I still would recommend reading it since when the novel introduces these ideas they are very fresh and interesting. Alpha legion is trying to bring some chaos cultist into compliance. Chaos cultists activate planetary self destruct blood sacrifice. Battle for the Abyss: The book is so bad that other authors tried to retcon it out of existence. This book is so bad that you would have it was cobbled together from Wardian fluff stitched together by C. Reading this book may, in fact, cause brain cancer so you should avoid it if at all possible. Everyone dies, so it does not affect much as in anything. The only thing you need to remember is Lorgar built a fuckhug space ship and filled it with Dreadnoughts, and it failed miserably. Tech Priests turn renegade after Horus tells them they can do whatever they like with technology, so they release forbidden viral scrapcodes and screw everything up. Also more subtle hints that the Emperor is a god himself by using divine golden light to heal machines and instant access super wikipedia. Contains a lot of Titan awesomeness and Knights badassery. And for extra Grimdark, a tech priestess discovers that the Dark Age era humans stored a backup copy of wikipedia in the warp and with a giant psyker powered terminal accesses said wikipedia and restores all the knowledge of mankind floods her forge with lava to deny the traitors access. A psyker tech savant meets up with the goaler of the Void Dragon and takes over his fuck long shift. Has a lot of twist endings. An assassin tries to kill the emperor. The Adeptus Custodes go to kill a traitor on Terra. The assassin was a Custodes probing the palace defences. The traitor was a triple agent working for Dorn. The bodyguard of the triple agent turns out to be an Sons of Horus assassin who detonates a bomb that kills the triple agent and nearly accomplishes a suicide run to destroy a bunch of reactors controlled by the triple agent. Wolf at the Door: The Space Wolves kill some dark eldar and are the defenders of everyone who does not defy the Emperor. When the liberated planet chooses freedom over Emperor, the wolves invade again. Scions of the Storm: The Word Bearers destroy a human civilization that has crystal cities, crystal robots, and lots of lightning. They worshiped the Emperor, but Lorgar no longer does. This is also later a chapter of The First

Heretic, but narrated from a slightly different point of view then. Turns out the youngest of the squad in the future used sorcery to beam back her consciousness through time onto some psykers on the Black Ship. Call of the Lion: Half of the Dark Angels are dicks, the other half are not. A story about the Emperor destroying one of the churches on Terra during the reunification era in his effort to wipe out religion. Emperor reveals himself as the very god the priest was worshiping, and nearly convinces him to stand by his side while his soldiers destroy the church. Priest gets cold feet and walks back into the church while it collapses. An end-times alarm clock starts ringing in the ruins. The War Hounds meet their primarch. Angron demeats the War Hounds. More specifically, the Emperor just beamed up Angron away from his last stand rather than, you know, intervening with his Custodes or his fleet, leaving Angron pretty pissed. The Lion fights a war to reclaim some Ordinatus devices and then hands them to Perturabo to gain his trust, not realising that his brother has already turned. Zahariel and Luther clean out a daemon cult on Caliban Part 1 of the Battle for Prospero. Runs through the Great Crusade where Magnus discovers the webway, but his Father already knew about it. Space Wolves come knocking shortly after. Tragedy ensues and the thousand sons become a thousand sons all over again. Ahriman starts writing hit Rubric. They fail because Horus sent a look-a-like, but in the process slay a shapeshifting daemoniac counter-assassin sent by Erebus. On the more vitriolic side, the writing is a bit underwhelming in places; highlights include calling a pariah a psyker, another pariah with a contrived possession, and Horus uttering one of the most cliché one liners out there. Feels less rushed than "Fulgrim". Goes from Monarchia to a bit of soul searching in the Eye of Terror and discovers Cadia. Leads up to Istvaan V and the immediate aftermath. Significant subplots revolve around the inception of Possessed Marines, and what happens to the Custodes babysitters watching over the Word Bearers, and how the protagonist Argel Tal gets into a tragic bromance with the Custodes leader. A limited release short story until an ebook was published. The other narrative takes place in the 40 year gap in The First Heretic, where Lorgar makes a pilgrimage into the Eye of Terror with a Daemon Princess as his guide. Then Kairos Fateweaver comes and "tells" him about Calth and his relationship with Guilliman and his upcoming war with him in the most confusing as fuck discussion ever. The truth of most of the things told to Lorgar are left ambiguous, because, well, Fateweaver; but also Chaos has a lot riding on the Heresy coming to fruition for reasons left not entirely explored. Part 2 of the Battle for Prospero. A civilian archeologist named Kasper Hawser hangs out with a company of the Space Wolves, where we learn a lot about their culture and attitudes. Turns out that Chaos infiltrated everything, so the outcome of Nikaea was practically rigged. A short story anthology. See the quote on the page on the Big Book of Astartes. The Imperium Secundus shows up, making for another bizarre plot element that ruins the series without adding anything. You know those memes on how the Alpha Legion causes mass paranoia without actually involving any Astartes? Oh, and to send the message that neutrality will be punished. The Iron Warriors were doing weird shit on that world for years beforehand, and was probably the more deciding factor than the lulz. Horus sent the one last remembrancer he had stored up as a gift to Dorn. Instead of in a box or eight or some shit like that, it was the Dan Abnett of his day telling Dorn that the grimdark galaxy was grimdark. Also, Iacton Quuze makes his first appearance since forever, but nobody gives a shit about Iacton Quuze. The Face of Treachery: The tie-in and conclusion of the audiodrama featuring the Raven Guard after Istvaan and the prequel to Deliverance Lost. We also learn that Corax has a supersekrit psyker ability which lets him roll a natural 20 on stealth checks no matter how ridiculous it would be, and that the Alpha Legion once again can out-troll everybody when they fuck things up for the World Eaters they let the World Eater commander think he was in command then blew his brains out when he tried to actually command. Ends with an transitory bit into Deliverance Lost. A couple war scenes later, Little Horus learns the hard way that the White Scars are pretty badass, but his PTSD starts acting up again and he gets his face shaved off before the White Scars are driven off. Everything is perfectly, absolutely fine", and "Therapy is for the weak. After the Mongolian shave, he gets his face reattached and ends up looking even more like Big Horus in the deal. The loyalists give them a fuck-you in the form of a Dreadnought. A few melodramatic and horrific but generic war scenes later, and they get overrun after a full year of siege thanks to the genius of a certain Barabas Dantioch, drop the fortress from the ceiling onto a titan, and get the hell out of there by hijacking one of the Iron Warriors warships via teleportation. An Ultramarine big wig was there to bring the

loyalists home, informing them that Guilliman was fortifying Terra and he needed good siege workers to stall the traitors then to fortify Terra. While loyalist Iron Warriors were pretty cool, the story itself was pretty forgettable; and it left some open questions like whether the continuity errors were the result of "faulty astropathic communications" see Outcast Dead or if the Ultramarines were trolling the Iron Warriors to join in with the Imperium Secundus. And also why the Iron Warriors were determined to take a hellhole at an immense expense of people and materiel, including Titans, while they could have just said "fuck yo shit!"
