The Profanity Filter is ON. Turn it off here. Plot Synopsis "There are those who believe that life here With tribes of humans, who may have been the forefathers of the Egyptians, or the Toltecs, or the Mayans. Some believe that there may yet be brothers of man, who even now fight to survive Some are fondly remembered while others come and go without notice. For the most part, the longevity of a television series is a true sign of success and popularity In a television show would come along that would prove to be very much the exception to the rule. It would also bear out the old saying "The candle that burns twice as bright burns half as long". Larson began working on a concept for a television program about a group of humans fleeing a marauding terror and banding together to fight a common foe, a storyline that he had been promoting with little success for several years. This infant concept would go on to become Battlestar Galactica, a program whose influence and popularity would reach beyond its single season run. With the whirlwind success of the film Star Wars, science fiction was quickly and suddenly the flavour of the month and this had a definite and direct influence on the Battlestar Galactica project getting a green light. Mind you, this is far from stating that the film Star Wars had an influence on the storyline and characters as portrayed in the show. Universal promptly counter-sued Fox stating that Star Wars was in fact a rip-off of its Buck Rogers series from the late s and R2D2 was declared a direct copy of the robots from its film Silent Running. All this said, the program remains a true marvel in the annals of amazing television. The Battlestar Galactica project eventually got a green light in the late 70s and, with the absence of any real quality sci-fi on the small screen, the ABC network in the U. When the executives at Universal saw the initial episode, they were amazed. Although shot and intended for network television, the scope of the story and the quality of the special effects were so great that it was decided that the initial episode of what was intended to be a mini-series could actually be reedited and released theatrically, which was done firstly in Canada to much box office success. The film was then released to a world wide market, including the U. Meanwhile, the studio and network were so excited by the show that the original idea of filming the show in several mini-series was abandoned and the show was instead quickly put into production as a weekly 1 hour program. This is one of the things which would be the death knell of the show. Of all the programs that had preceded it, Battlestar Galactica was for its time the most expensive television show in history. The great thing for the show especially the pilot episode was that the millions of dollars thrown at the production are on screen for much of the program. Hot off the success of his work on Star Wars, effects wizard John Dykstra took the helm of the special effects department and with his visual mastery created vehicles and space battles that would be the envy of any sci-fi project anywhere, television or otherwise. Still, the pilot episode set a great benchmark for the quality of a tele-movie, and this is another thing that would eventually bring down the show, for the staggering amount of special effects seen in the first episode would be impossible to do week to week, both in regards to time as well as financially. Each week, viewers were treated to a continuing spectacle about a convoy of ships much like the Wagon Train to the Stars that Gene Roddenberry intended Star Trek to be fleeing from the deadly race of Cylons, a race of mechanized beings that were dedicated to the destruction of the human race. With all human colonies all but destroyed, the last remnants of the 12 tribes of man have come from near and far in whatever ships they have been able to procure in a last desperate attempt to save themselves and the human race. While the Galactica, commanded by Commander Adama Lorne Greene , lead the fleet in the quest for the planet Earth, the Cylons were lead by the traitor Baltar John Colicos , a former member of the Council of the Twelve and the only human to be allowed to live in the new Cylon order. Baltar commands his own Base Star the Cylon equivalent of a Battlestar and leads the mechanical army in a continual quest to destroy the last vestiges of the human race. In the midst of the horror that the Cylons wish to inflict on the humans, those aboard the ships that make up the

fleet attempt to make something of their lives, and the show revolves around a central core of characters that inhabit the Battlestar including Commander Adama and his children, Captain Apollo Richard Hatch and his sister Athena Maren Jensen, Lt. Boomer Herb Jefferson Jr. Starbuck Dirk Benedict, Lt. Each week was a story of struggle and adventure as the convoy eluded the Cylons in a quest to find Earth. That was the idea, anyway. Because of the hectic production schedule, principal photography might not begin for an episode until a Wednesday. This might be fine, except the show screened on a Sunday night, giving the production team just a few days to write a script, construct sets, shoot footage, score, edit and present the final episode to the network for broadcast. This often saw principal photography taking place on a Saturday for broadcast the next day. To their credit, the production team for the show did a fantastic job with the limited time afforded them, but the downside was that because the show was produced in such a hurried fashion, corners had to be cut. The most glaring example of this was in the massive overuse of space flight stock footage. While the space flight scenes created by Dykstra and Co. This limited the writing staff as they had to keep their scripts within the realm of what footage they could use from the pilot episode. Fans of the series will vividly remember the shot of the Cylon Raider banking right, only to have a trail of laser fire catch up with it resulting in an elliptical explosion. While fans might overlook or tolerate such production limitations, the general viewing public began to lose interest as the story of the fugitive fleet fell into a repetition of stock shots. While the pilot episode was a ratings bonanza, the weekly show slowly sank in the ratings and at the end of its run finished 24 overall. Despite the massive U. Despite the numerous Emmy, Grammy and Golden Globe Awards the show was nominated for and won, despite the huge amount of money invested in the show and the following it had achieved, the ABC network unexpectedly pulled the plug on the show. It was a decision that the network would later regret. ABC soon realized their mistake in cancelling the groundbreaking show, and a follow-up program, *Galactica* was hastily produced. While this show could have been an opportunity to wrap up the saga, in fact the reverse was the case. Filmed with a limited budget, and with only a couple of characters and stars from the original show Lorne Greene and Herb Jefferson Jr. Fans of the original *Battlestar Galactica* largely consider the storylines and events in *Galactica* to be apocryphal. Unlike the *Star Trek* franchise, *Battlestar Galactica* was a lone entity in terms of television and film development. For fans of the show, the silence was deafening. Still, there were those who believed in the program and continued to resurrect the show. A chance occurrence at a *Star Trek* convention sparked a renewed interest in Hatch to bring back the show. All this at a *Star Trek* convention. Hatch realized that if there was this level of interest, then surely a renewed television series or film would be a success. Using his own money, Hatch produced an extended teaser trailer for a possible feature film called *Battlestar Galactica: Sadly, while Battlestar Galactica: The Second Coming* gained much attention as Hatch took it on the convention circuit, it was not enough to get enough people sufficiently interested in bringing back the project as he envisioned it. It was probably inevitable that the production of a follow up to the *Galactica* saga would get the green light in some form, and in the end it was a re-imagining of the *Galactica* story helmed by Australian Director Michael Rymer who had directed *Queen of The Damned*, the second film in the Ann Rice Vampire Chronicles series. As was the case with the *Damned* film, it looks to be a case as history repeating itself as the new incarnation takes some of the ideas, characters and concepts from the original series and updates them in a new and hip style. The problem is that this looks to completely bypass the original series and instead of continuing the story of the remnants of the 12 tribes looking for the legendary Earth it instead makes the Cylons a race of human-looking androids originally created by man! Throw in some strange gender twists Starbuck and Boomer are now female?!? All in all, despite its premature ending, this series was a true marvel in the history of television. I so wished to see a second season of this show, and seeing it again after all these years had me wanting it even more. Finally, we have the original on DVD to satisfy the craving for a trip down nostalgia lane. A great trip, but far, far too short. After hundreds of generations of war, the human race stands on the edge of peace. For a thousand yahrens years, mankind has waged war with the Cylons, a race of mechanicals that will stop at nothing to destroy the human race. But things look a bit more positive for the future as Count Baltar, a member of the

Council of the Twelve representing the twelve tribes of humans in the known galaxy, has been in secret talks with the leaders of the Cylon empire and has arranged an armistice, a truce between the two warring civilizations. In fact, Baltar has betrayed the entire human race and instead of leading the fleet to a welcoming committee, they instead have been led into a trap with thousands of Cylon raiders heading in to wipe out the entire human fleet before turning to destroy the home worlds of each of the twelve tribes of man. In the ensuing attack by the Cylons, a few humans manage to escape the onslaught and it is Commander Adama, the last living member of the council and the commander of the last great military ship of the fleet, the Battlestar Galactica, that sends out the call for all humans that remain to set sail in whatever ships can be made to work. The plan is to gather together under the protection of the last Battlestar and continue in a convoy on a search for the homeworld of the lost 13th tribe of man, a planet called Earth. It is hoped that once Earth is found, they can regroup with their long lost cousins and defend the remains of humanity once and for all. This pilot was a huge production and quite an undertaking by Universal. Still, when the show was finished it was so impressive that the studio executives released the pilot in re-edited form in a theatrical run around the world. This pilot was aired in the U.S. Written by Glen A. Larson and Don Bellisario. Starring: After successfully escaping just the void, the pair return to the fleet with the news. Meanwhile, Boomer and Jolly have discovered a fortified Cylon base located on the surface of an asteroid. This leaves the Galactica in a quandary, for if the fleet travels straight ahead, they go straight into the magnetic void and a fate unknown. After completing their patrol, Boomer and Jolly return to the Galactica, but little do they know that they have brought with them a deadly virus from the Cylon asteroid. Salik is unable to cure, desperate times call for desperate measures and the call is made to those with the aptitude to take the place of the stricken warriors, and it is the shuttle pilots of the fleet that answer. Of course, because of the perpetual state of war that exists, almost all male pilots have enlisted in the service, and since most of the viper pilots are ill, the great majority okay, all of the new volunteers are women. While many balk at the idea including Apollo when he hears that Serina has enlisted, the fleet is heading into perilous times and all must heed the call. Now, Commander Adama has a perilous decision to make, and it is decided that the void is the only safe way of passage. All of this is set to the backdrop of Apollo having proposed to Serina and a wedding is set for the time when the fleet might be at greatest risk. As their vows are pledged, a bright star and its lone planet suddenly becomes visible in the heavens. Adama knows just what this could be, proclaiming it as the planet Kobol as in the Lords of Kobol, the birthplace of humankind. The Commander, Apollo and Serina travel to the planet they believe to be Kobol and are greeted by a scene of magnificent desolation. The ruins of a great civilization are evident. Some scenes were filmed on location at the Great Pyramids in Egypt, but there is no sign of life. All is not well, though, as the following Cylons have failed to be deterred by the threat of the magnetic void and Baltar has ordered them in to find the Galactica and the fleet. As Apollo, Serina and Adama search the ruins in the hope of finding some record of the 13th tribe, Baltar makes a surprise appearance. But as Adama and Baltar debate, the Cylons attack the ancient city, including the ruins where Adama and Baltar are. When part of the ceiling collapses and traps Baltar, he is left to his own fate, but the same sword of fate that traps Baltar also strikes Serina as she is shot by a Cylon landing party. Before Adama is able to read any of the ancient writings, he is forced to flee the planet with Apollo and the now dying Serina. Having escaped the Cylons once again, the Galactica and the fleet must face an unknown future, as must Apollo who is now forced to be a single father to Boxey after the premature death of Serina.

October 21st â€” Abingdon, VI Another glorious morning! We had a very quiet trail head last night. I slept 8 straight hours. Man did that feel good. After about a half hour I crossed over into Virginia on my drive this morning. My plan for the day was to check out Abingdon. I had done some research and there were a number of antique stores there. I love towns like Abingdon. The streets are wide, parallel parking, and almost all the antique stores are on the same block. It made for a quicker trip this morning. Before I checked out the antique stores I visited a candy store. Besides candy they also sold some gellato. They had a lot of the old style candy that you seem to only find in a place like this. I found a cute Pez dispenser for Violet. As usual, I enjoyed my walks through the stores. In one a vendor was selling real Confederate money. Maytag is an advertiser that I see frequently when watching those shows. I guess they are right when they mention Maytag dependability. This is the best one of these type coolers that I have ever seen. It would be perfect at the front of a family style restaurant. I had to smile when I saw this old transistor radio. I remember how incredible we thought it was when you could actually walk around and listen to the radio. I also remember that they had a lot of static. Collecting soda bottles is a big hobby. Even vendors that have a booth full of furniture will typically have a few soda bottles for sale as well. They do record a time in history. It would take a while to go through this tub to find something in particular you were seeking. I guess pop bottle caps are similar to collecting the bottles, but I would think those would be much harder to find since people typically just through those away. When I was leaving Abingdon to head to Damascus to meet up with Janet, I came across a seller of classic cars. Of course I had to stop. Unfortunately the place was closed, so I put a few nose prints on the windows as I was ogling the cars. They all looked to be in pristine condition. Our plan was to spend the night at a trail head near Damascus, but when we got there we saw a sign that said it was closed from So we headed up the road hoping to find another spot that would work. Why not take a shot we thought. It turned out to be a great idea. The owner just retired after 19 years in the Army and he is an avid fisherman. His dream was to have his own fishing lake and campground. It might be 1 acre in size. The supposed RV sites are really flat spaces with a picnic table. They do have volt plug-ins, but no water or sewage. In their favor is free wi-fi that actually works.

The Desolation of Smaug Theatrical Release: Having mined the three Lord of the Rings books similarly, Jackson knows and clearly loves author J. Tolkien and large-scale fantasy filmmaking. But this latest franchise has felt less like a long-awaited cultural phenomenon and more like going back for seconds in search of certain profit. So too are the reviews, as they would almost have to be. Whereas the Rings films competed for Best Picture and many other Oscars culminating with a record-tying 11 wins for the third installment, these Hobbit films have been lucky to pick up a handful of technical award nominations, none of which it seems likely to win after consecutive shutouts. And yet, many moviegoers around the globe are enjoying going back there in these prequels, the first two of which have each grossed around a billion dollars worldwide. As far as sequels go, The Desolation of Smaug feels rather self-contained. Nonetheless, Thorin reunites with the dozen or so dwarves and with young Bilbo Baggins Martin Freeman, whose services as a master burglar are needed. With ugly beasts in pursuit, Gandalf and the large group take refuge in the house of Beorn, a "skin-changer" who takes different forms at different times. The party passes through a treacherous forest before running into giant spiders who weave them up in webs. After an escape, the group is taken prisoner by Legolas Orlando Bloom and his fellow Elves. Smaug, the titular dragon, finally appears just before the two-hour mark, awoken by Bilbo as he searches for the Arkenstone. Alas, it gives way to an overload of action that makes you eager for the long end credits scroll to begin. The biggest problem may simply be that this is too long. Not enough occurs to justify the runtime, which is too vast for the film to keep viewers entertained from start to finish. Plenty of great ones have run well over two hours. What I can say is that there are so many opportunities to trim this. Instead of showing reaction shots from six characters, why not just pick three? Instead of lingering on establishing shots, why not keep the story moving? But these films could be much more fulfilling and enjoyable by Jackson doing less and being willing to part with inessential moments that add little of note to the experience. Until growing interminable at its end, Desolation stays fairly engaging throughout. It features less comedy and more action than its predecessor. Beheadings abound for a film that families flock to at the holiday season. In content, it moves closer to the bulk of Rings than Journey did. There is surprisingly little power to Bloom reprising the part whose promised to launch a major career has faded since he got off the sinking ship that is Pirates of the Caribbean. The film does an admirable job of infusing set pieces with creativity. The dwarves are rolled out of prison in barrels, which they then ride into rapids. In a different era or a world without the Rings trilogy, this film could easily have been a spectacular event akin to an Indiana Jones or Star Wars episode. But it is not, suffering from comparisons to Rings and the many recent and ongoing tentpole franchises. It seems most improbable for this series to rise in stature with its final installment as the Rings trilogy did. If it follows the pattern established by the first Hobbit and the three Rings movies before it, you can expect an Extended Edition with further bonus features to hit Blu-ray and DVD in November, not long before There and Back Again wraps up this saga. The Desolation of Smaug motion poster: The picture leaves a smidge of room for improvement, perhaps because compression is tighter than it needs to be on such a spaced-out set. The first of them, "New Zealand: Home of Middle-Earth, Part 2" 7: While I have no doubt that Extended Edition features will expound on it, this content enlightens, entertains, and should satisfy the typical viewer. Next comes a recording of a live March stream. The responses are complemented by some raw and behind-the-scenes footage. Four Production Videos. They have a sense of humor, capturing a playful side of post-production with costume parties and dwarves exercising, but also give us an understanding of production with glimpses at such tasks as the guy who spots and reports on approaching planes overhead that could ruin takes. A Trailers section holds three theatrical Desolation of Smaug previews 7: Many studios, including Warner, neglect to include trailers these days, so these are welcome company. Related promotion
