It has been a very long time since its last appearance, over seven years. This is a gentle card that shows the moment when two people connect. As a Cups suit card, this meeting is emotional. What drama does it depict? Probably the oldest one of all – boy meets girl. The woman stands quietly as the young man steps forward, reaching out to take her cup or even to touch her. What might such a caress ignite? When will it come? Who will it be? Where is my soul mate? These are big questions, important questions. For these are matters that dwell at the very heart of our human existence. After almost five decades of reading the Tarot for people, I can tell you beyond the shadow of a doubt – Love makes the world go round. The Two of Cups illustrates the vulnerability and openness of true heart-to-heart connections. In many ways, this card echoes the Lovers card of the Major Arcana. Like the angel that oversees the man and woman in The Lovers, a winged being presides over the couple. However, this red lion represents courage, our wild instincts, and the physicality of desire. As he gazes down upon this couple, he offers his blessing. So while it is true that sexual attraction is often what first brings people together, here we see a sweetness and regard that is more refined than simple physical interest. Further emphasizing this, below the lion is the caduceus of Hermes, symbol of wisdom and healing. This union is a divine gift to each. It can be a partnership of almost any kind as long as the alliances are based on mutual respect and understanding. It may also depict how there are often wonderful friendships in our lives that have an undercurrent of attraction, but they remain chaste, for any number of reasons. In whatever friendship, love, or alliance this may illustrate, there is great depth and joy. I used to think that I ended with my skin, that everything within the skin was me and everything outside the skin was not. I believe that the old paradigm of separation and alienation is dying, crumbling under its own untruth and pain. We are, in fact, inescapably, completely interconnected to one another, and the cosmos around us – a cosmos that may be most accurately named Love. Under this sign of balance, diplomacy, and, ruled by Venus, romance, what might you wish for? What magical seeds of love do you hold in your loving cup? This card is a blessing to your relationships with all genders – new, old, and yet to be – but especially partnerships of the heart. If there has been strife, now is the time for a peace offering; harmony in all your partnerships needs to be a priority. If you are married, how can you strengthen your commitment, friendship, and intimacy? What loving gifts of joy do you long to exchange this week? For those who seek love, this Two is a reminder that need is not love. Like the couple depicted, in order to nurture a strong, equal, committed love relationship, you must meet on equal footing. Do you feel that your own life is already joyful, empowered, and beautiful? Only then are you ready to offer a worthy gift for your hoped-for beloved. Only when our own cup is full, can we share our very best with another, and receive in kind. What is in the Cup that you seek? What is in the Cup that you offer? May it be blessed, and so may all to whom you offer yourself.

However, being an owl sometimes my flight schedule gets in the way of the simple enjoyments of life. I was wearing my annual shirt at the airport and answering intrigued questions for a few hours before i boarded the steal beast. Basically you drink, network, check out the city, and donate to kids all in one place. You cannot beat that. As an owl, I generally fly at night. However each year I take one evening off to spend time with a group of creatures that will make you smile from ear to ear. There are costumes, glow sticks, kids, elderly, and your general bunch of Wild things mixed in. The atmosphere of the moon ride is easily one of the most fun I have ever experienced. Everyone is happy, and I mean every one. There is music kicking from all sorts of devices, and people are lining the streets just waiting to share a high five or drink with you. Every year as I call off the hunt, I join forces with a monkey and any other creature of the night to enjoy a boozy ride throughout the city. This year we joined up with some hula girls, a banana, and a civilian. Yes we had an owl, monkey, and a banana and nobody took a bite out of anybody. The truce is real. The ride starts with a countdown on tenth street in which all the riders pack together to begin the adventure. Then slowly but surely our stallions pick up speed and enter some of the best neighborhoods In the city. The wonderful APD escorts us safely throughout the streets. During the ride we hop off at bars, make new friends, and enjoy the glory of riding a bike at night. The patrons of bars and parties make their way out to the streets and begin to feed off the already positive energy. There is a constant flow of motion and positivity that can only be described by wheels in motion. Thank you for an amazing time, and let the official countdown begin. Until then I will resume my role as the wise creature of the night.

Owls - Symbology and Mythology. These birds were most often associated with the Crone aspect of the Goddess. The owl is often a guide to and through the Underworld, a creature of keen sight in darkness, and a silent and swift hunter. It can help unmask those who would deceive you or take advantage of you. Owls are believed to have played a more prominent role in early Celtic cults, and could perhaps have derived from a more broadly based deity of a common European descent. Predating the Greek cult of Athene, for whom the owl was an animal attribute, were images of these mysterious birds in Celtic lands. Owls are believed to be a sacred animal to the famed Cult of the Head. They often appear with human heads and with bovines, such as rams and bulls, all of which have been determined by scholars to be objects of this strange cult. In modern Scottish and Welsh languages, the owl, by the etymology of the word alone carries negative connotations of death and darkness. Then, in later Gallo-Roman times the Owl lost its cult significance, but has been linked to a Celtic goddess associated with fertility. The most famous myth dealing with the owl is in the story of Bloudeuwedd, contained in the Mabinogi. Lleu, one of the central characters of the story has a wife created for him by the magician Gwydion, because his mother forbade by her own word that he would never marry any ordinary woman. Bloudeuwedd is her name, and as the tale goes she tricks Lleu into divulging the secret to his own mortality, convincing him to even demonstrate how. In the process, Bloudeuwedd then kills Lleu, who avenges his death by turning her in and owl, from which she receives her namesake in Gaelic. A prime example of owl imagery are the handle fittings found with a famous cauldron found in Bra, Jutland that dates to the 3rd century B. The cauldron was found in a bog in Bra, and was believed to have been a votive offering that was broken into pieces before it was deposited. When put together, the cauldron spanned over a meter in diameter and was adorned by several owls and bulls heads. In the Celtic style, the fitting bears the face of an owl through an arrangement of shapes that terminate at the end of some columnar tendril designs. In Ancient Greek mythology the Owl was a creature sacred to Athena, Goddess of the night who represented wisdom. Athena, the Greek Goddess of Wisdom had a companion Owl on her shoulder, which revealed unseen truths to her. The Ainu in Japan trust the Owl because it gives them notice of evil approaching. They revere the Owl, and believe it mediates between the Gods and men. The bird features prominently Celtic folklore where it is considered both to be sacred and to have magical powers, again because of its abilities in the dark. Zulus and other West African nations consider the bird a powerful influence in casting spells, and think that using parts of the owl gives great strength to a person involved with magical incantations. To the Welsh, the Owl is a night predator -- the only bird capable of defeating the swift falcon and then only at dusk, its time of power. The Owl symbolizes death and renewal, wisdom, moon magick, and initiations. Their Goddess Arianrhod shapeshifts into a large Owl, and through the great Owl-eyes, sees even into the darkness of the human subconscious and soul. She is said to move with strength and purpose through the night, her wings of comfort and healing spread to give solace to those who seek her. A star and moon Goddess, Arianrhod was also called the Silver Wheel because the dead were carried on her Oar Wheel to Emania the Moon-land or land of death , which belonged to her as a deity of reincarnation and karma. In general, the hooting of an Owl is considered a portent of death or bad luck, and it may even prophesize death, as the death of Dido was foretold. It is a medical fact that most people die at night, and for that reason also the Owl has been seen as the messenger of death. For Christians the Owl traditionally signifies the Devil, powers of evil, bad news, and destruction. Similarly, in the Old Testament the Owl is an unclean creature that stands alone as a figure of desolation. In an Australian Aboriginal myth the Owl is the messenger of bad news. Yama, the Verdic God of death, sometimes sent out the Owl as his emissary. Indigenous peoples of the Americas consider the Owl to be the Night Eagle because it is silent and deadly in flight, and is a solitary bird with all-seeing eyes. The Owl is generally regarded as a bird of sorcerers because of its association with--and abilities in--the dark. It symbolizes deception and silent observation because it flies noiselessly. The Owl is feared by peoples who believe that the death warning is in its hoot. In the Navajo belief system, the Owl is the envoy of the supernatural world and

earth-bound spirits. The Pawnee understand the Owl as the Chief of the Night and believe that it affords protection. The Cherokee honor the bird as sacred because of its night-time vision, and wish to draw that power to themselves to see in the dark. Symbolism Perception, Silent Observation, Wisdom, Deception The Owl has a dual symbolism of wisdom and darkness, the latter meaning evil and death. They are symbolically associated with clairvoyance, astral projection and magick, and is oftentimes the medicine of sorcerers and witches, you are drawn to magickal practices. Those who have owl medicine will find that these night birds will tend to collect around you, even in daytime, because they recognise a kinship with you. The two main symbolic characteristics of the Owl, its wisdom and its nocturnal activity-- have made it represent perception. Considering perception in a spiritual context, Owl medicine is related to psychism, occult matters, instincts, and clairvoyance-- the true ability to see what is happening around you. The owl can see that which others cannot, which is the essence of true wisdom. Where others are deceived, Owl sees and knows what is there. Use your power of keen, silent observation to intuit some life situation, Owl is befriending you and aiding you in seeing the whole truth. The Owl also brings its messages in the night through dreams or meditation. Pay attention to the signals and omens. The truth always brings further enlightenment. The Owl, symbol of the Goddess, represents perfect wisdom. Owls have the ability to see in the dark and fly noiselessly through the skies. They bring messages through dreams. The Owl is the bird of mystical wisdom and ancient knowledge of the powers of the moon. With wide-open, all-seeing eyes, Owl looks upon reality without distortion and acknowledges it, yet is aware that with ancient magickal and spiritual knowledge, he or she can make changes.
