

**Chapter 1 : The New Human : Mary Rodwell :**

*Mary Rodwell, RN is the Founder and Principal of Australian Close Encounter Resource Network. (ACERN). Born in the United Kingdom (UK) and eventually migrating to Western Australia in , she currently resides in Queensland.*

Abductions vs Adductions Researchers R. They were not abducted taken away from Earth ; they were adducted taken toward the Stars. From a multidisciplinary perspective, many Participants viewed themselves as developing a multidimensional perspective about their encounters with ETs. They tell us that the star visitors are the ancestors of humanity, and created us. They say most of our species are still asleep and need to be awakened to our true heritage, and that they have come here to help, particularly with new ecologically and spiritually based technologies. Roger Leir, author of *e Aliens and the Scalpel*. It is waiting for our arrival. Gaia is already at the destination she wishes to be; she is waiting for us to move with her. In each of us we have this knowing, but for some it is yet inaccessible by the very DNA programming that has created us and is then sustained by the dense manipulation of the matrix we live in. This information is here to activate and awaken our truth. I felt I was surrounded by a bubble of energy and by high-frequency beings as I read the information in Chapter Fourteen. This indicated to me that this information is true and vital for humanity. Some, not so benevolent, wanting humanity to remain enslaved in a limited, lower 3D reality without knowledge and connection to our divine gifts and source energy. However, some of us have already started to have our DNA activated to overcome some of the modifications. The DNA in its current state of the sleeping individual is causing disease, disharmony, dissatisfaction and separation. This has created a mindset of greed and violence, which has led to global unrest with planetary environmental destruction and a propensity for war. The individual behavior and thinking are thus affecting us globally. This keeps us in fear and chaos and easily controlled by powerful beings both human and off -world with negative agendas. It is happening at birth for some children, to increase their consciousness and override dominant patterns and conditioning that the rest of us are subjected to. Others of us may not have received this upgrade at birth but have been switched on and activated later in life. This switching on occurs by increasing frequencies. We live in a time where increased photonic light packages from the sun, combined with benevolent galactic higher-dimensional input, has commenced the process of awakening the individual. The DNA that is being activated holds some further keys to awakening. We need to understand, as others have stated in the chapter, that some of the alien DNA that has been engineered into the human is blocking this process. This inorganic DNA acts as a receiver to further negative influences and ensures control by non-benevolent beings. In addition, we have been tricked into carrying forward fear-based DNA patterning and programming from past life Karma and family lineage inheritance. This is further enhanced by cultural and societal influences geared towards individuals striving for acceptance and therefore sustaining the sleeping status quo. To complete the picture, we also need to be aware that there are biological, environmental and energetic negative manipulations e. Chemtrails, toxins, EMFs electromagnetic, low-level frequencies subliminal hypnotic symbolism, and much more, all ensuring we stay asleep, keeping the DNA blocked, making it harder to activate, clean and clear. To state this more plainly, the non-benevolent manipulators of our DNA continue to influence and control us by keeping us in fear, asleep and separate, with less hope of DNA activation to a more evolved human being. The work of those of us that have overcome some of this DNA manipulation i. The DNA needs to be activated. Cleaning, clearing splicing out the inorganic negative alien aspects, removing inherited patterns and negative karmic influences along with additional influences of the matrix. Upgrading the DNA to its original Divine blueprint for innate abilities. This would allow an elevated level of joy, peace, and love, the ability to self-heal, and heal others, increased intuition and connectedness, development of higher senses like clairvoyance and clairaudience and an increased connection to a higher power, with greater wisdom and expanded awareness and knowledge, and more. A connection to the truth of who we were originally meant to be! The first wave of individuals, including the new children and the light workers already activated on the planet, can help bring in the necessary frequencies. The DNA can be altered by frequencies held in symbols, sacred geometry, artwork, music, mantras, light language and by transmission through high-vibrational counseling, information and

touch. All of this is becoming available by those of us capable of embodying higher frequencies and acting as conduits of this high-frequency galactic light. We also need to be aware of the negative side of some of these modalities. Lower vibrational forms e. Working in 3D and in higher dimensions, the DNA can be upgraded. As mentioned, pieces of the inorganic alien DNA, additional receivers toxins and parasites, etc. This clears the physical, emotional and energetic body, bringing forth the New Awakened Human. The newly awakened human, as a collective, can provide the tipping point towards the restoration of the planetary balance and harmony and subsequent survival of the human species on the earth. The benevolent galactic beings supporting this movement toward awakening are working very hard on a DNA level to assist humanity with this.
