Background[edit] Near the time when the copyright to the English Revised Version was due to expire , the Oxford University Press and the Cambridge University Press , who were the current English Revised Version copyright holders, began investigations to determine whether a modern revision of the English Revised Version text was necessary. In May G. Hendry , along with the Presbytery of Stirling and Dunblane produced a notice, which was presented to the General Assembly of the Church of Scotland , indicating that the work of translating should be undertaken in order to produce a Bible with thoroughly "modern English. Translation[edit] In due time, three committees of translators and one committee of literary advisers were enlisted and charged with the task of producing the New English Bible. Each of the three translation committees was responsible for a different section of the Bible. The work of translating was typically undertaken in this fashion: A member, or members, of one of the committees would produce a draft of a book, or books, of the Bible typically from the section in which they were assigned and submit the draft to the section committee. Occasionally a scholar outside the committee would be invited to participate in this phase of the translation process and was asked to submit a draft of the book or books with which he or she had renowned experience. This draft was then distributed among the members of the appropriate committee. Members of the committee would then meet and discuss the translation choices made in the draft. The draft that resulted from this meeting of the concerned committee was then sent to the committee of literary advisers, who would revise the draft in co-operation with the translators. When a consensus on the draft was reached, the final draft would be sent on to the Joint Committee, which was head over the four sub-committees. For the New Testament the New English Bible Translators relied on a large body of texts including early Greek New Testament manuscripts, early translations rendered in other languages those aside from Greek , and the quotations of early Christian writers and speakers. Tasker and published by the University Presses of Oxford and Cambridge Form[edit] The translators of the New English Bible chose to render their translation using a principle of translation called dynamic equivalence also referred to as functional equivalence or thought-for-thought translation. Dodd goes on to summarize the translation of the New English Bible as " Reception[edit] Because of its scholarly translators, the New English Bible has been considered one of the more important translations of the Bible to be produced following the Second World War. Bruce , then Rylands Professor of Biblical Criticism and Exegesis in the University of Manchester , declared that "To the sponsors and translators of the New English Bible the English speaking world owes an immense debt. They have given us a version which is contemporary in idiom, up-to-date in scholarship, attractive, and at times exciting in content Eliot , however, commented that the New English Bible "astonishes in its combination of the vulgar, the trivial and the pedantic. However, directly following the Second World War the English of the United Kingdom and Europe began to be influenced by foreign idiom , especially that of the Americans. For this reason, passages found in the New English Bible could be understood by a large body of English speaking individuals. It rendered pronouns among other particles using the traditional literary method followed by many previous translations in which the generic use of "he" is translated faithfully from the original manuscripts. However, using this traditional literary method has become recently controversial, among some Christian circles, and a revision of the New English Bible titled the Revised English Bible was undertaken that included gender-inclusive language. This led to its revision into the Revised English Bible. Contributors to and sponsors of the New English Bible[edit].

Macklin died on October 25, and it is uncertain whether he lived to see the finished work. The printers no doubt intended to correct what seemed to them a mistake, and which is no doubt an unfortunate rendering. The exact meaning is vain, empty, and therefore foolish. Jerome and Pusey consider this idol shepherd as an Antichrist of the future, and Bishop Wordsworth sees in him the Pope of Rome as adored in the church of St. Peter by the cardinals after his election. The work was done by Jane Aitken, daughter of Robert Aitken, and sold in four volumes, beautifully crafted. This adaptation to Cockney usage is found in an 8vo Bible published by the Oxford Press. A large quarto, with the spelling, punctuation, italics, capitals, and distribution into lines and pages followed with the most scrupulous care; the type is Roman instead of Black Letter, and the ornamental initials at the beginning of the chapters are mere fancy work.
