What do you know? The timeline that very sensibly starts with the beginning of time! This timechart is based on the biblical dating system of Archbishop Ussher ; it is the work of Edward Hull , an Irish geologist, cartographer, and artist. Science cannot settle the question of origins because scientists have a total inability to do more than speculate regarding the qualities of a newborn universe. Hull relied carefully on Scripture while creating his lovely timechart! The first, The Wall Chart of World History includes an update through the twentieth century as well as some politically correct, anti-creationist opinion statements in the margins. When this was the only edition in print, it was the edition that we used and enjoyed. Please watch this page for details! The more recent facsimile edition, The Timechart of Biblical History, is thoroughly Christian and creationist. If anyone publishes a facsimile edition featuring the best of both of these, please let me know! It will surely find kudos here! Both editions are oversized, slim, bound volumes that unfold accordian style to form a reversible, durable, 15 foot timeline! Both editions show concurrent major historical events world-wide, not just in Palestine, not just in the West. The chart can either be kept intact as a book or removed from its binding and affixed to a wall. This truly is an awesome resource for studying history. Our children study history chronologically as a team, using the resources in our own home library with the timechart serving as the outline. I recommend this approach, using this book. When our first copy came in the mail, my children and I were, within five minutes, all lying on the floor reading it, enjoying the colorful pictures, and looking for our "friends and acquaintances" from the past! As we pored over its richness, my nine year old daughter hugged me in her excitement and said, "Oh, Mom! I just love history! Content posted at ValeriesLivingLibrary. *This book has been specially researched and designed to provide the ideal companion to Biblical studies. In the panels of this book there are thousands of new and interesting insights into the greatest stories ever told.*

Great empires, dynasties, rulers from King Solomon to present times - a panorama of history covering 40 centuries before Christ and 20 centuries after his birth. Based on the famous and now very rare Victorian wallchart with much material specially reproduced from the world famous British Library held in the British Museum, London. It has an over 30 foot timeline of history starting with Adam. Shows what was happening throughout the world at the same time. Kings, major battles, treaties, even US presidents. Amazing By Stephen Balbach on Apr 25, This timechart was originally made in , here re-produced as a facsimile, which outlines the late Victorian world view of history. It is delightfully non politically correct - history ends at bc and only western, biblical and Chinese civilization is represented. The period present has been added in this edition. It is printed on sturdy cardboard in a large format folded book. It is most useful for understanding the 19th mainstream view of history, such as an adjunct when reading literature from the 19th century, or any non-fiction work about the 19th century. I reference it all the time, it has helped me understand the Victorian world view. It is a fairly accurate guide for western and "oriental" history starting around the time of the Roman Empire going forward. Starts from Adam and Eve and goes to the present age indicating what when on in other countries during each century. Williams on Jun 09, My daughter has this book and after seeing hers, wanted one of my own. She recommended I shop at Amazon where I found it readily available. Sent in a timely manner, and as described. By Julie on May 17, It was received when it said it should be, it was a gift for my dad and he said it was acceptable, for him that means good. Four Stars By Nana on Jul 31, Great to see the graph of activities simultaneously,all over the world at any particular time in history. Several people Would be interested in purchasing. Four Stars By R. I was impressed at how nice it was and also at the size of it. I opened it up and seen that it began with Adam and Eve at Creation which is true because the Word of God say so. Then on the next page the time covering the period between creation and the flood it has several large pictures of so-called "cave me" and suggests that mankind lived in caves before the flood. The Bible plainly says that Cain built the first city and named it after his son Enoch. The civilization that then was is described in these few verses. And Cain knew his wife; and she conceived, and bare Enoch: And unto Enoch was born Irad: And Lamech took unto him two wives: And Adah bare Jabal: And Zillah, she also bare Tubalcain, an instructor of every artificer in brass and iron: Charles Darwin is in a place called Hell in which he refused to believe and he will never get out until God brings him before his Great White Throne to judge him according to his works. Only to be cast into the Lake of Fire where he will never get out. This is the only destiny for those who deny the Divinely appointed sacrifice for their sin. The darling Son of God, Jesus! Do you know you are going to Heaven when you pass from this life? For with the heart man believeth unto righteousness; and with the mouth confession is made unto salvation. For the scripture saith, Whosoever believeth on him shall not be ashamed. For there is no difference between the Jew and the Greek: For whosoever shall call upon the name of the Lord shall be saved. Jesus Christ is the Word of God. I got my money back and tossed this foolishness. By Jake Taylor on Nov 13, Absolutely amazing book! Been looking everywhere and ordered many different versions but this one is perfect. Perfect History Overview By Mary Booth on Jul 28, This book gives just enough detail to give general understanding of world history! Add to that Bible chronology, and you have the perfect study aid. No confusing details, just a perfect overview! This is my 4th or 5th book. I keep giving them away! A must for anyone trying to understand European royalty, wars and history in particular. Add a Book Review Book Summary: This particular edition is in a Hardcover format. It was published by Barnes and Noble, Inc and has a total of 34 pages in the book.
