Six Gun Drive (Trailsmen, book 8) by Jon Sharpe - book cover, description, publication history.

His writing style is pacey and the author is always sure to satisfy anyone looking for a well written western novel to pass away a few hours. Chances are you may have a western lurking in the collection written by Reasoner. He is a man of many names. A true modern version of the pulp writer. Everything he writes is the result of a consummate professional at work and he has gained many gleaming critical reviews. He has written at least a couple of crime classics - Dust Devils is amazingly good and stuck around in my mind for weeks after reading and his early crime novel, Texas Wind enjoys cult status with paperback collectors. The series currently numbers four books with maybe more to come. I put it to the author that the books were , although obviously linked to the TV version, in fact totally separate entities. I also try to point out, in the notes at the end of the books, which parts are historical and which are fictional. I wondered how much of the TV series Reasoner was familiar with? All of us who write fiction veer away from the truth. I put this to him "Good point about Calamity Jane. I think that by and large the TV show got the characters right. For example, the epidemic that occurred during the first season on TV, in which Calamity nursed the sick, actually took place two years later in And as you mentioned, Hickok and Bullock are friends in the TV show when in actuality Bullock arrived just after Hickok was killed. But the personalities of all the characters are pretty accurate as far as I can tell. I like a strong plot and plenty of action. Much beyond that, though, and I have a hard time accepting a book as an actual Western. Who has influenced this one man writing machine? Howard is my all-time favorite writer, not only for what he wrote but how he did it, forging a successful career as a professional writer in circumstances not favorable to that at all. Frederick Faust aka Max Brand and a horde of other pseudonyms , H. Patten, Leslie Scott, probably many others from the pulps. Shirreffs, and Merle Constiner. Some of them wrote Westerns, too, of course. But as you can tell, the pulps have been a big influence on me. So where does Reasoner see the future of the genre? Sales have dropped drastically over the past fifteen years, but the numbers seem to have bottomed out now and have even climbed a little in the past couple of years. No country for old man was very much a western. Nor do I mind admitting that my own feelings are sometimes contradictory, because I love those Roy Rogers movies that have cars and airplanes in them and have no trouble accepting them as Western movies. Although Roy Rogers movies are really a genre unto themselves. And it was nominated for a Spur Award, so there I go, shooting down my own argument in the previous question. I never claimed to be consistent. The only thing I have coming out under my own name is one of the books in the new Gabriel Hunt adventure series, sometime next year. This series was created by Charles Ardai, the publisher of the Hard Case Crime series, and is intended to do for adventure fiction what Hard Case Crime has done for hardboiled and noir fiction. Schow, Nicholas Kauffman, and Raymond Benson. The covers by Glen Orbik are beautiful and very much in the pulp spirit. My preference is to have a four to six page outline that gives me a good general structure for the book. But I also like having the freedom to be creative as I go along and add and subtract elements as needed. Occasionally I plan really far ahead. In that case, all you can do is apologize to the readers and move on.

By Neil Hunter Bodie was a bounty hunter, a legalised killer, a man alone. Killing was a trade and Bodie was for hire to anyone with enough money and desperation. Yet there was one man who tried to take Bodie for a two-bit greenhorn. Bodie aimed to kill the men responsible. He had once been a lawman, but now he tracked outlaws for bounty, and for his own satisfaction. Only this time it was different. Bodie had a personal stake in wanting these men dead. For a killer, a private quarrel can be fatal! Angela Crown came to Bodie with a proposition " she wanted to hire his gun. This sonofabitch had enough money to hire every two-bit gunslinger in town " all to kill Bodie. There was also a beautiful, wealthy and cold-blooded whore called Beth Arling and she, too, had good reason to want Bodie dead! They called the man Coyote. A half-breed, a ruthless killer. It needed an equally ruthless man to run him to ground. There was only one gunman that could measure up. The first complication came in the voluptuous form of Eden Chantry, a girl Bodie knew from way back. The second big problem loomed in the shape of Silva, a hitman from the East. They hired a killer. He was called Bodie. For the first time in his life it looked like The Stalker had bitten off more than he could chew. He hit Bodie with everything he had. Bodie was kicked, beaten, damn near killed. They were both hunters, outcasts, loners. And they were both on the trail of the same man " a bible-spouting killer called Parson Kane. It was obvious that neither Bodie nor the Indian could take Kane and his Comancheros alone. But in Pueblo Diablo, they discovered that even as a team they may have bitten off more than they could chew. The first five came out in , the sixth, and last followed in Death Comes to Jubilation. It is still possible to find the books, Linford also published them in large print editions, but the magazine is much harder to find. Piccadilly Publishing has recently been putting the series out in ebook form and the first two are available now. Click on the above images to see larger versions.
