Chapter 1 : Free Uniden Telephone User Manuals | calendrierdelascience.com

Advanced DECT technology operates on the newly released GHz frequency band. Uniden DECT incorporated unique "listen before transmit" technology that avoids interference with many household products, such as baby monitors, microwaves and WiFi.

Use CID to move the cursor past a digit without changing it. You will hear a confirmation tone. If you make a mistake simply start over from Step 1. The system plays back your new greeting. You have three record time options. On some older models: Ring Time Ring Time allows you to set the number of rings the caller hears before your answering system plays the outgoing message. You can set the ring time to answer after two, four,or six rings. If you enable the Toll Saver TS , the answering system picks up after two rings if you have new messages, and after four rings if there are none. The default security code is Remotely Accessing The Answering Machine You can operate your answering system from a remote location using any touch-tone telephone or the handset if it allows that capability. Remote Access away from home You can check, play, or delete messages, even record a new greeting message when you are away from home. Additionally, you can turn On or Off your answering system from a remote location depending on model. If the answering system is off, it will answer after about 10 rings and sounds a series of beeps. You will hear a beep 4. Command charts vary on model Note: With this service, you can see the name and number of incoming callers. If you do not subscribe to caller ID with your local telephone company, caller ID will not display for incoming calls. These features may or may not work depending on the model that you have. Is the phone cord hooked to any splitters, computers, fax machines, caller ID boxes, or secondary answering machines? Are there any other phones in the residence besides the Uniden? The Uniden may not be getting enough through the jack the to pull up the caller ID information. The signal strength needed for each phone is different. See if the phone works there. Uniden phones pick up the caller ID after the second ring. Last resort Test â€" Try the unit in another residence to see if it works there. The phone must be in standby mode. You can also mute the ringer tone while the phone is ringing by pressing Do Not Disturb on the base. Silent Mode You can silence the ringers on the base and all handsets for a specific period of time 1 to 9 hours or set the ringers to be off all the time; the answering system answers any incoming calls without playing anything through the speaker. The phone prompts you to select the number of hours 1 â€" 9 or Always On that you want it to stay in silent mode. The phone turns on the answering system and displays Silent Mode On. After the selected number of hours, the phone automatically exits silent mode. There currently is no phone support for cordless phones, online support only. If you have purchased a Uniden cordless phone from the following online stores please contact their customers service at support factoryoutletstore.
