

The X-Men movies did one thing which I thought was almost impossible to do for the movies, and that is to massage the multi-characters' egos into one feature length film within reasonable screen time.

In the comics, Bolivar Trask is the head of Trask Industries and creator of the mutant-hunting Sentinels. Days of Future Past. Cudmore wore a foam latex muscle suit covered with a chrome-plated plastic plus a hard plastic head to have the metal skin on the set, with some digital augmentation being used to enhance the facial expressions. A digital double was used only for stunts that could not be achieved practically, such as the Fastball Special where Colossus throws Wolverine. Mark Helfrich portrays an unnamed mutant with ash-gray skin. These include Phat , a mutant that is a very large man who can slim down to fit in a smaller space played by two actors, Via Saleaumua "large mode" and Richard Yee "small mode" ; [28] Spike played by Lance Gibson , a mutant who battles Wolverine in the forest by extruding bony spikes from his flesh the character was added because the editing team felt that the original cut of the scene portrayed Logan as a cold-blooded killer, which could be changed if another mutant attacked Wolverine before he struck the Brotherhood [33] and Glob Herman played by Clayton Dean Watmough , a mutant with transparent skin. Olivia Williams portrays Moira MacTaggert. Many fans believed this was Toad however, the credits list him as lizard man and Brett Ratner confirmed it was Anole. Avalanche and Vanisher also appear; however, it is not known who portrayed them. Production[edit] Matthew Vaughn left , who would later direct X-Men: Development[edit] Bryan Singer , the director of the first two X-Men films, left the project in July in favor of developing Superman Returns. In February , with still no director hired, Fox announced a May 5, , release date, with filming to start in July in Vancouver. Brett Ratner , who was previously considered to direct X-Men in , replaced Vaughn during pre-production. Flyby for Warner Bros. X2 co-writer Zak Penn was separately working on his own draft, and the two joined forces for a combined screenplay in January Kinberg wanted " The Dark Phoenix Saga " to be the emotional plot of the film, while " Gifted " would serve as the political focus. The studio considered killing him off-screen with a dialogue reference, but Kinberg and Penn insisted that Jean kill him, emphasizing their relationship. The Wrath of Khan , as Fox felt the script called for a dramatic turning point. Kinberg and Penn were originally cautious, but grew to like the idea of killing off Xavier. Wolverine , limitations were set on which mutants could be used for cameo appearances in X-Men 3 in an attempt to avoid risking character development for Wolverine. The part of Nightcrawler was so minimal, however, that the studio felt it was not worthwhile to go through the long and costly makeup process, and the character was cut. It also felt like he might tread a little bit on the terrain of Beast, in terms of similarities in the characters and their political standpoints in terms of dealing with their mutancy. Afterwards came a scene in the Danger Room , which was considered for the previous X-Men films but never included for budget and writing concerns. The writers tried to make the simulation not feel extraneous by showcasing some of the character conflicts and abilities in a " Days of Future Past "-inspired battle with a Sentinel. Another repurposed scene was Magneto attacking the convoy to free Mystique, Madrox and Juggernaut, which Penn had previously envisioned for X2. Kinberg agreed, as he previously argued with Penn about "blowing so many things early in the movie". The Last Stand began shooting in August and wrapped in January Much of the film was shot at Vancouver Film Studios , the same location of X2. Dante Spinotti , a frequent collaborator of Ratner, replaced him, with assistance of J. Even the actors had problems with getting full screenplays, the call sheets did not reveal all the characters, and many scenes were shot in varied ways. As compositing supervisor Matt Twyford detailed, "the elements consisted of cold, rainy night live-action footage from Vancouver, sunny day miniature elements, traditional misty day background plates of San Francisco, and of course the CG bridge and fx elements. But Powell finished the Ice Age score early to accept the X-Men job even if it meant a tighter schedule. Powell included references to the score from the previous two films as "it all had to be in the same family, and the same language". From Concept to Feature Film. The Official Game , doing the script along with screenwriter Zak Penn. Patrick Stewart also appears as Professor X. If only the rest of X3 had followed suit. Billed as the climax of a trilogy, the third and weakest chapter in the X-Men series is a blatant

attempt to prove there is still life in the franchise. The film X-Men: Days of Future Past has subsequently been viewed by some critics as a revision of those controversial plot elements in X-Men: Days of Future Past and the scenes with Leech, which he described as "really sweet moments". My X3 would have been 40 minutes longer. It became wall-to-wall noise and drama. I would have let it breathe and given far more dramatic elements to it. The Last Stand was also the highest-grossing film in the franchise, until it was surpassed by X-Men: Days of Future Past eight years later.

Chapter 2 : X-Men: The Last Stand | Marvel Database | FANDOM powered by Wikia

To be honest there are none of the X-men movies I like, except for Last Stand, especially since this is the one X-men film that everyone seems to hate which I don't understand.
